

BATAVIA KILL STREAM MANAGEMENT PLAN

Developed by
Greene County Soil & Water Conservation District

Batavia Kill Stream Management Plan

January, 2003

Developed For

**New York City Department of Environmental Protection
Stream Management Program**

71 Smith Ave., Kingston, NY 12401
Phone (845) 340-7512 Fax (845) 340-7514
Beth Reichheld, Program Manager reichheld@dep.nyc.gov

Developed By

Greene County Soil & Water Conservation District

907 County Office Building, Cairo, NY 12413
Phone (518) 622-3620 Fax (518) 622-0344
Rene' VanSchaack, Executive Director rene@gcswcd.com

TABLE OF CONTENTS

Section I. Executive Summary	i-1
Section II. Introduction & Objectives	ii-1
Section III. Introduction to Stream Management	
A. Stream Hydrological Regime	iii-1
1. Flow Levels	iii-1
2. Flow Timing	iii-2
3. Flood Frequency	iii-3
B. The Fluvial Form	iii-4
1. The Bankfull Discharge	iii-6
2. Stream Channel Dimension	iii-7
3. Stream Channel Pattern	iii-8
4. Stream Channel Profile	iii-9
C. Hydraulic Geometry Relationships	iii-10
D. Stream Classification	iii-11
E. Fluvial Processes	iii-12
1. Lateral Migration	iii-15
2. Channel Aggradation	iii-15
3. Degradation	iii-16
F. Stream Channel Evolution	iii-17
G. Traditional Management Activities	iii-19
1. Stream Crossing	iii-19
2. Stream Channelization	iii-20
3. Check Dams	iii-21
4. Gravel Management	iii-21
5. Streambank Protection	iii-22
H. Stream Restoration Methods	iii-22
I. Natural Channel Design Concepts	iii-23
1. Addressing Bank Stability	iii-25
Section IV. Batavia Kill Watershed Description	
A. Regional Setting	iv-1
B. Watershed History	iv-3
C. Physiography	iv-8

1. Tributaries & Watershed Symmetry	iv-8
2. Hydrophysiographic Region	iv-9
D. Geology & Topography	
1. Geology	iv-10
2. Glacial Influences	iv-13
3. Watershed Soils	iv-15
4. Topography	iv-23
E. Water Resources	
1. Precipitation	iv-27
2. Batavia Kill Stream	iv-28
3. Priorities Waters List	iv-31
4. Lakes & Ponds	iv-31
5. Groundwater	iv-32
6. Water Usage	iv-33
7. Stream Gage Network	iv-33
F. Wetlands/Floodplains	
1. Wetlands	iv-35
2. Floodplains	iv-37
G. Aquatic & Terrestrial Wildlife	
1. Terrestrial Habitat	iv-39
2. Fish Populations	iv-40
3. Trout Stocking	iv-41
4. Trout Habitat	iv-43
5. Biological Characteristics	iv-43
6. Base Flow Conditions	iv-44
7. Fishing Access	iv-46
H. Riparian Vegetation	
1. Role of Riparian Buffers	iv-47
2. Batavia Kill Riparian Conditions	iv-48
3. Invasive Species	iv-50
I. Land Use/Land Cover	
1. Historic Land Use	iv-53
2. Trends in Land Use/Land Cover	iv-54
3. Current Land Use/Land Cover	iv-55
4. Property Use Classification	iv-57
5. Land Use Regulation	iv-61
6. NYC Watershed Rules & Regulations	iv-61

J. Population and Demographics	
1. Watershed Population Trends	iv-63
2. Second Home Population	iv-64
3. Population Density	iv-64
K. Infrastructure	
1. Water Supply	iv-66
2. Waste Water Treatment	iv-67
3. Stormwater Systems	iv-68
4. Transportation	iv-69
L. Flood Control District	iv-71
M. Institutional Resources	iv-74
N. Watershed Protection Programs	iv-77

Section V. Batavia Kill Inventory & Assessment

Introduction

A. Water Quality Assessment

1. Importance of Water Quality Indicators	v-2
2. Selection of the Batavia Kill for BMP Pilot Studies	v-3
3. Future Monitoring	v-4
4. Water Quality Monitoring Results	v-5

B. Watershed Inventory & Assessment

1. Valley Morphology	v-14
2. Stream Order	v-17
3. Hydrological Assessment	v-20
4. Infrastructure Inventory	v-31
5. Flood Control Structures	v-33
6. Recommendations for Additional Studies	v-38

C. Stream Corridor Assessment

1. Phase I - Inventory and Assessment	v-39
2. Phase II - Stream Classification & Hydraulic Geometry	v-43
3. Phase III - Stream Stability Assessment	v-47
4. Phase IV - Site Feasibility Evaluation	v-52
5. Watershed Reference Conditions	v-52
6. Geology Assessment	v-54
7. Biological Surveys	v-57
8. Summary of Assessments	v-61

Section VI. Batavia Kill Reach Summary & Recommendations

Introduction	
A. Management Segment 1 (Source to C.D.Lane)	vi-6
B. Management Segment 2 (CD Lane Park to CR 65 Hensonville)	vi-30
C. Management Segment 3 (Hensonville CR 65 to Windham CR 12 South St)	vi-44
D. Management Segment 4 (CR12 South St to West pf Ashland)	vi-66
E. Management Segment 5 (Vogatz property to Confluence with Schoharie Creek)	vi-124

Section VII. The Batavia Kill Demonstration Projects

A. Demonstration Project Goals	vii-1
B. Demonstration Project Location	vii-2
C. Restoration Strategies	vii-3
D. Restoration Design Process	vii-4
E. Bidding & Oversight	vii-5
F. Project Construction	vii-6
G. Inspection & Monitoring	vii-9
H. Maintenance & Repairs	vii-10
I. Demonstration Project Description	vii-10
J. Tropical Storm Floyd Impacts	vii-16

Section VIII. General Recommendations

Introduction to General Recommendations	viii-1
A. Flood Prevention	viii-3
B. Education & Outreach	viii-15
C. Riparian Zone Management	viii-23
D. Stream Management Activities	viii-31
E. Water Quality	viii-36
F. Public Enjoyment	viii-40
G. Fisheries Habitat	viii-42
H. Programmatic Resources	viii-44
