Re: Schoharie Watershed Stream Management Program 2019-2021 Action Plan

The Greene County Soil and Water Conservation District (GCSWCD) and the NYC Department of Environmental Protection (DEP) have collaborated with the Schoharie Watershed Advisory Committee (SWAC) to develop the 2019 – 2021 Action Plan. The Action Plan provides the Schoharie Watershed Stream Management Program's activities, projects and programs that are planned for 2019-2021 as well as program accomplishments.

The Action Plan is divided into key programmatic areas:

- A. Protecting and Enhancing Stream Stability and Water Quality
- B. Floodplain Management and Planning
- C. Highway and Infrastructure Management in Conjunction with Streams
- D. Assisting Streamside Landowners (Public and Private)
- E. Protecting and Enhancing Aquatic and Riparian Habitat
- F. Enhancing Public Access to Streams

The Action Plan is updated and revised annually. This plan will be implemented from May 2019 – May 2021.

Schoharie Watershed Stream Management Program 2019-2021 Action Plan

Purpose

This Action Plan identifies stream management goals, presents a subset of stream management plan recommendations and identifies current implementation initiatives by the Schoharie Watershed Stream Management Program for the period 2019-2021. The Action Plan also provides the current status or progress of each action item.

<u>How to read this document:</u> The Action Plan is organized around key programmatic areas. For each topic area, a list of recommendations, derived from Stream Management Plans and program staff, are provided in *italicized text*. Following the recommendations, the ongoing projects, programs and activities, including those that are funded through the Stream Management Implementation Program (SMIP), are listed.

Background

The Schoharie Watershed Stream Management Program (SWSMP) was established in a partnership between the Greene County Soil & Water Conservation District (GCSWCD) and NYC Department of Environmental Protection (DEP) in 1997 as part of the Filtration Avoidance Determination (FAD) issued to DEP by the Environmental Protection Agency. Stream Management Plans have been completed for each major river corridor in the Schoharie Watershed and each plan includes a set of general recommendations, and project specific recommendations, which provide a "road map" for improved stream and floodplain management. In addition to supporting the FAD, many SWSMP projects also targeted reductions to in-stream sources of suspended sediments as part of DEP's Shandaken Tunnel State Pollution Discharge Elimination System (SPEDES) permit established in September 2006. The SWSMP seeks to advance state-of-the-art watershed management projects, policies and programs to improve and protect the Schoharie's water resources. Initiatives include the Stream Management Implementation Program (SMIP), the Catskill Streams Buffer Initiative (CSBI), stream and floodplain restoration projects, stream and watershed assessments, local flood analysis and mitigation, and education and outreach programs.

The following Action Plan summarizes the programs and projects that GCSWCD will be leading within the Schoharie Basin between May 2019 and May 2021, and includes action plan updates through May 1, 2019. The GCSWCD will lead the efforts for each action item, and work cooperatively with watershed partners including, but not limited to, the Schoharie Watershed Advisory Committee (SWAC), NYCDEP, NYSDEC, CWC and watershed municipalities. Funding sources for our action items include, Stream Management Implementation Program (SMIP), Catskill Streams Buffer Initiative (CSBI), Watershed Assistance Program (WAP), Water Resources Development Act (WRDA), Catskill Watershed Corporation (CWC), DEP/GCSWCD Schoharie Watershed Stream Management Program (Contract), Federal Emergency Management Agency (FEMA), and Natural Resource Conservation Service Emergency Watershed Protection Program (EWP).

Program Administration

The Schoharie Watershed Stream Management Program requires on-going administrative and organizational support to implement stream management efforts. Many of the program administration action plan items began around 2007 and will continue through the duration of the stream management program. Additional action items may be added as the program evolves and as program goals are refined.

PROGRAM AD	MINISTRATION			
Action Item	Partners	Description	Funding	Status
Program Administration and Implementation Inter-Agency Coordination	NYCDEP, GCSWCD, MSMA, SWAC GCSWCD, NYCDEP, NYSDEC, USACOE	The GCSWCD has developed an effective and efficient process for implementation of the stream management plans for Schoharie Creek and its associated tributaries. These efforts help to fulfill the NYCDEP FAD obligations. Development and implementation of the program is an on- going process. Facilitate coordination between the agencies with stream management responsibilities. This is a key component of	NYCDEP/ GCSWCD SMP Contract NYCDEP/ GCSWCD SMP	On-going
Schoharie Watershed Advisory Committee (SWAC)	USACOE Schoharie Basin Municipalities, Technical Advisors, GCSWCD, NYCDEP	SMP implementation. The organizational structure of the Schoharie Watershed Advisory Committee (SWAC) was developed in early 2008. After the kick off meeting in May 2008, the SWAC has met regularly throughout the years, developed program materials to initiate a stream management plan implementation process, and identified projects for implementation. Administrative support for the SWAC remains an on-going activity, with SWAC member reappointments, town re- adoption of SMPs, signing of MOUs to collaborate on stream issues, regular municipal updates and SWAC meetings.	Contract NYCDEP/ GCSWCD SMP Contract	Organized May 2008, meet 2-3x per year
Catskill Streams Website	NYCDEP, GCSWCD Schoharie SMP Contract	The GCSWCD will continue to provide logistical support in the development and maintenance of the Catskill Streams Website as a valuable tool for sharing information with watershed stakeholders. The GCSWCD will also continue to maintain and update the District's website.	NYCDEP/ GCSWCD SMP Contract	On-going
Plant Materials Program	NYCDEP, GCSWCD	GCSWCD will continue to maintain its Plant Material Center, stocked with species native to the Catskills, in a way necessary to hold over/grow out native plant material to be used at stream restoration sites. Tasks include the ordering of plant material, willow harvesting, maintaining an inventory of the plants in the PMC, clearing plants of harmful weeds, watering as frequently as necessary and re- potting materials if they outgrow their containers.	NYCDEP/ GCSWCD Contract	On-going
Operation and Maintenance	NYCDEP, GCSWCD, Landowners	The GCSWCD, NYCDEP and project partners will work to maintain project sites throughout the Schoharie Creek watershed. This may include, but is not limited to, supplemental planting, bioengineering, minor repairs, general maintenance and assessments as needed.	NYCDEP/ GCSWCD SMP Contract	On-going, maintenance plan developed annually in Spring

A. Protecting and Enhancing Stream Stability and Water Quality

Protecting and enhancing stream stability and water quality may include: stream corridor assessments; stream stabilization/restoration projects with goals to restore stream stability and reduce the targeted pollutant; monitoring and maintenance of stream projects; and outreach, education and technical assistance to encourage stream stewardship.

STREAM CORRIDOR ASSESSMENT AND MONITORING RECOMMENDATIONS

1. Complete a watershed assessment of tributaries within the Schoharie Creek Watershed that have yet to be assessed and conduct updated assessments of sub-basin streams to record current conditions. These tributaries should be studied to identify and prioritize sediment sources, erosion hazards, and potential water quality impairments and associated treatment opportunities.

2. Review existing water quality data and identify, to the extent possible, the most significant water quality impairments.

3. Identify locations of potential water quality impairments including; sources of pollution from upland areas and within the stream channel such as significant glacial lake clay exposures, and sources of contaminants from road runoff and households, and make prioritized recommendations for their mitigation.

4. Identify, monument and survey selected sites of bank erosion, assess their relative stability, and make prioritized recommendations for their treatment.

5. Monitor constructed stream restoration sites to document the projects' status and performance. Monitoring will include measurements and analysis of geomorphic form, rock structures, and vegetation. Monitoring will be performed in accordance with Army Corps of Engineers permit requirements as well as GCSWCD/NYCDEP annual assessments of the need for additional monitoring. Data will be collected to monitor project stability and vegetation establishment.

STREAM ASSESSMENTS AND MONITORING					
Action Item	Partners	Description	Funding	Status	
Stream Inventory and Assessment	NYCDEP, GCSWCD	Stream Feature Inventories (SFI) are an on-going priority to assess baseline conditions and identify potential projects. The West Kill and Gooseberry Creek SFIs were conducted in 2018. The East Kill and Sawmill Creek SFIs will be conducted in 2019. Stream corridors to assess in 2020 will be determined in winter 2019.	NYCDEP/ GCSWCD SMP Contract	Active	
Monitoring of Restored Stream Reaches	NYCDEP, GCSWCD	Annual monitoring of restored stream reaches provides valuable information on the effectiveness of restoration practices in addition to fulfilling the permit requirements associated with these projects. Monitoring includes a visual inspection of the reach, photo documentation, pebble counts, and a survey of monumented cross sections and the longitudinal profile.	NYCDEP/ GCSWCD SMP Contract	Years 1, 2, 3 and 5 post- construction; schedule developed annually in January	

Vegetation	NYCDEP,	Annually, the GCSWCD and project partners monitor the native riparian vegetation that has been installed along streambanks within the Schoharie watershed. Riparian plantings are completed in conjunction with the installation of natural channel designed (NCD) stream restoration projects and CSBI projects. Vegetation provides for increased stability as trees and shrubs continue to mature, and it is a critical component to the long-term success of these types of projects. Annual vegetation monitoring provides valuable information on the effectiveness of restoration practices in addition to fulfilling the permit requirements associated with	NYCDEP/ GCSWCD SMP	Annually, Schedule updated in
Monitoring	GCSWCD	these projects.	Contract	January

STREAM RESTORATION AND STABILIZATION RECOMMENDATIONS

1. Identify locations where roads, bridges, or culverts and water quality may be threatened by SMP prioritized bank erosion, or are otherwise unstable or threatened, and make prioritized recommendations for their treatment.

2. Identify locations where improved or residential areas and water quality may be threatened by bank erosion, and make prioritized recommendations for their treatment.

3. Identify locations of stream instabilities contributing to water quality impairment and make prioritized recommendations for their mitigation or treatment.

4. Implement stream stability restoration projects that have been identified through field assessments or prioritized in management plans.

5. Governmental landowners in the Schoharie Creek watershed should manage their lands using natural channel stability concepts, and should serve as a model for other watershed landowners.

Action Item	Partners	Description	Funding	Status
		A full-channel restoration project located on the Batavia Kill at		
		the border of Ashland and Prattsville is in the assessment and		
		design phase. This project will result in a plan to stabilize		
		eroding streambanks and protect water quality by reducing fine		
		sediment sources along this high-turbidity producing reach of		
		stream. The design will address over a mile of severely		
		degraded stream. The project will be implemented in phases.

CR78 Culvert on Tributary to East Kill Bed Stabilization	GCSWCD, NYCDEP, GCHD	This project is located upstream of an existing culvert crossing on an unnamed tributary to the East Kill. The culvert has capacity issues that result in bed instability upstream and downstream of the structure. This project is intended to install bed stability structures in the reach upstream of the culvert replacement to achieve long term bed stability and habitat protection. Assessment and design began in 2018 and is slated for construction in 2019	SMIP	Active
East Kill Streambank Stabilization near CR 78 Bridge	GCSWCD NYCDEP	Assessment, survey and design to correct a slope failure just downstream of the Colgate Lake Road bridge over the East Kill. Construction of the project is scheduled for 2019.	SMIP	Active
Meadow Brook Lane	GCSWCD, NYCDEP	Restore approximately 5,840 square feet of streamside vegetation along a portion of the Stony Clove in Hunter. Plant 60 riparian trees and shrubs and install 50 willow stakes. Site requires grading prior to planting. Project is scheduled for construction in 2019.	CSBI	Active

STREAM STEWARDSHIP EDUCATION AND OUTREACH RECOMMENDATIONS

1. Collaborate with local and regional partners to enhance education and outreach efforts related to stream and floodplain management, sediment and erosion control, and other topics critical to sound watershed management.

2. Maintain a watershed website to provide information to watershed stakeholders.

3. Develop publications focused on stream management which can be provided to watershed stakeholders and/or used in training workshops.

4. Host a Schoharie Watershed Month with various events planned for watershed residents and visitors to promote awareness and stewardship.

5. Increase public and technical awareness about the importance of the Schoharie Creek watershed and ecosystem by providing educational workshops for a variety of stakeholders including, riparian landowners, municipal leaders, planning boards, code enforcement personnel, highway departments, local businesses, contractors, developers and educators.

6. Increase technical awareness of stream science, water quality protection and best management practices by providing educational workshops for a variety of stakeholders including, riparian landowners, municipal leaders, planning boards, code enforcement personnel, highway departments, local businesses, contractors, developers and educators.

7. Develop detailed, science based guidelines to stream management which are readily available to those entities responsible for stream activities in the Schoharie Creek watershed. Guidelines must emphasize natural channel stability.

B. Floodplain Management and Planning

Floodplain management and planning may include: floodplain assessments; coordination of floodplain management efforts in the watershed; and outreach, education and technical assistance for floodplain management in the Schoharie Watershed.

LOCAL FLOOD ANALYSIS AND FLOODPLAIN ASSESSMENT RECOMMENDATIONS

1. Identify locations where roads, bridges, or culverts may be threatened by flooding, and make prioritized recommendations for their treatment.

2. Identify locations where improved or residential areas may be threatened by flooding, and make prioritized recommendations for their treatment.

3. Support flood hazard mitigation efforts to reduce the impacts from flooding such as impacts to public safety, homes and businesses, infrastructure and the natural environment.

4. Through LFA provide resources to help WOH municipalities: confirm that there is a significant flood hazard in the target area through engineering analysis; use engineering analysis to develop a range of hazard mitigation alternatives; the primary focus of the analysis is to identify the potential for reducing flood elevations through channel and floodplain restoration, as the first alternative to other hazard mitigation solutions; evaluate both the technical effectiveness and the benefit/cost effectiveness of each solution, and compare different solutions to each other for the most practical, sustainable outcome.

LOCAL FLOOD ANALYSIS AND FLOODPLAIN ASSESSMENT

Implementation	Windham	floodplain in Windham.	Contract	Active		

FLOODPLAIN MANAGEMENT COORDINATION, EDUCATION AND OUTREACH RECOMMENDATIONS

1. The GCSWCD should support local municipalities in the use of FIRM maps.

2. Municipalities in the watershed should conduct a review of current floodplain ordinances and adopt revisions as appropriate. Revisions should reflect current building trends, new technologies, compliance and integrated broader community plans as appropriate.

3. Schoharie Watershed municipalities should evaluate participation in the FEMA Community Rating System.

4. Access to flood prevention/protection information should be established and supported throughout the Schoharie Creek Watershed.

5. Watershed municipalities, working with local and state agencies, should support periodic training sessions on flood related issues. Audiences should include municipal leaders, code enforcement staff, planning boards, landowners, realtors, lending institutions and others.

6. Watershed municipalities should facilitate development of a flood damage reporting system to track types of flooding, their location and the costs associated with flood damage.

7. Stream and floodplain management guidelines, which integrate stream form and function, should be developed for use during post flood response.

8. Identify locations where roads, bridges, or culverts may be threatened by bank erosion or flooding, or are otherwise unstable or threatened, and make prioritized recommendations for their treatment.

9. Identify locations where improved or residential areas may be threatened by bank erosion or flooding, and make prioritized recommendations for their treatment.

C. Highway and Infrastructure Management in Conjunction with Streams

Highway and infrastructure management in conjunction with streams may include: best management practices (BMPs) to improve infrastructure and stream intersections; stormwater management; and outreach, training and financial assistance to infrastructure managers to demonstrate BMPs.

HIGHWAY, INFRASTRUCTURE AND STORMWATER MANAGEMENT RECOMMENDATIONS

1. Local municipalities, Greene County Highway Department and NYSDOT should place a priority on vegetation management on critical areas such as roadside ditches and steep slopes.

2. Watershed municipalities should evaluate winter road abrasive procedures to address abrasive quality, application methods and spring sweeping.

3. The Town and County Highway Departments and NYSDOT should integrate geomorphology principles in all new projects and routine maintenance activities related to the Schoharie Watershed.

4. Work with local highway departments to minimize the negative effects of bank armor through the use of vegetation within and above the armor. Replant existing rip rap. This will both increase the effectiveness and strength of the rip rap and cool water temperatures through shading and reducing the thermal effects of heated rock.

5, Work with the SWAC Highway Committee to identify opportunities to address infrastructure that is leading to stream instability and water quality degradation.

RECOMMENDATIONS FOR OUTREACH AND TECHNICAL SUPPORT TO HIGHWAY DEPARTMENTS, STORMWATER MANAGERS, AND CONTRACTORS

1. Provide municipal highway departments and local contractors with hands-on training in various stream management activities. Conduct field days, workshops and demonstration projects to meet this goal.

2. Educate and train municipal highway departments in stream process, and provide them with information about how maintenance of road systems and other public infrastructure may impact local waterways.

3. Provide education and outreach to municipal highway departments, stormwater managers and contractors to improve their ability to recognize changes in stream stability and impacts to water quality that may be associated with infrastructure management activities and to understand the impact of any management action they may take.

OUTREACH & TECHNICAL SUPPORT TO HIGHWAY DEPARTMENTS, STORMWATER MANAGERS & CONTRACTORS

Action Item	Partners	Description	Funding	Status
		This training targets contractors, engineers, local government		
		and watershed residents and provides knowledge about why		
		stormwater is a concern and information on the new GP-0-		
		15-002 permit. The training also informs participants about		
		the requirements of stormwater pollution prevention plans		
NYS DEC endorsed		(SWPPP). Participants learn about erosion and sediment		
Erosion and Sediment		control practices and how to perform site inspections, and

D. Assisting Streamside Landowners (Public and Private)

Assisting public and private streamside landowners may include: providing access to training and technical information to increase water resource knowledge, skills and capabilities of landowners; and providing technical assistance and programmatic support for stream issues and riparian restorations.

CATSKILL STREAMS BUFFER INITIATIVE

1. Preserve and protect existing riparian buffers and provide for improved stewardship.

2. Efforts should be made to protect/enhance the stream corridor through the establishment of effective forested buffers. Stream buffers will offer some measure of protection against encroaching land uses and act to protect public and private property.

3. Assist landowners with their efforts to protect and maintain healthy riparian buffers, address invasive species, and improve the condition of unstable or degraded riparian areas.

4. Provide assistance with managing and preventing the spread of Japanese knotweed and other invasive species.

5. Provide assistance for streamside landowners to maintain diverse and healthy riparian buffers of at least 35-100 feet using native shrubs, trees and other woody vegetation.

CATSKILL STRE	CATSKILL STREAMS BUFFER INITIATIVE						
Action Item	Partners	Description	Funding	Status			
Ashland Town Park Project	GCSWCD, NYCDEP, Ashland	GCSWCD obtained landowner agreement with the Town of Ashland, graded 1,250 ft of streambank and controlled 0.77 acre of Japanese knotweed in 2018. GCSWCD will continue JKW control in 2019 prior to planting a demonstration riparian buffer.	CSBI	Active			
Japanese Knotweed Treatment	GCSWCD, NYCDEP	Treat Japanese knotweed with herbicides on stream restoration sites and Catskill Stream Buffer Initiative project sites. Sites will be treated in 2019 as needed.	CSBI GCSWCD NYCDEP SMP Contract	Active			
DEP Parcel 5251 Planting	GCSWCD, NYCDEP	Riparian planting to restore 3.6 acres of streamside vegetation along a portion of the Schoharie Creek in Lexington, NY. GCSWCD will plant 1,570 native trees and shrubs along 1,800 feet of streambank.	CSBI	Active			
CSBI Landowner/ Project Recruitment	GCSWCD, NYCDEP	Conduct site visits with landowners interested in the CSBI program to recruit future riparian buffer planting projects.	CSBI	On-going			

OUTREACH, EDUCATION AND TECHNICAL ASSISTANCE TO STREAMSIDE LANDOWNERS

1. Provide streamside landowners detailed technical information on the establishment and maintenance of riparian buffers.

2. Provide stakeholders technical assistance that will guide restoration of stream system stability and help to maintain ecological integrity. Technical assistance can range from a landowner consultation to activities that will help meet the priorities of protecting water quality and establishing riparian buffers.

3. Provide long-term access to technical assistance to landowners and municipalities for assessment of their stream-related problems, and development of effective management strategies and to supervise stream project implementation.

4. Educate streamside landowners by providing a basic understanding of fluvial process, factors impacting streambank stability and water quality, and management decisions for the promotion of a healthy stream.

5. Characterize current riparian vegetation management in the watershed and make prioritized recommendations for changes that can improve ecosystem integrity.

6. Educate municipal leaders by providing a basic understanding of fluvial process, with an emphasis on how local decision makers can support stream health through their leadership and provide information on the multiple benefits which can be realized by protecting stream and watershed health.

OUTREACH, EDUCATION AND TECHNICAL ASSISTANCE TO STREAMSIDE LANDOWNERS

		Workshop at the Mountain Top Library in Tannersville,				
		April 13th, 2019. The workshop was available to individuals who own streamside property in Hunter,				
		Tannersville, Windham, Ashland, Jewett, Lexington, and				
		Prattsville. Attendees learned how to establish and increase				
		the riparian buffer zone on their own property by planting	NYCDEP/			
Streamside Landowner	GCSWCD,	native trees and shrubs. Participants learned about the	GCSWCD	Completed		
Workshop	NYCDEP	Catskill Streams Buffer Initiative (CSBI) program.	CSBI	2019		

E. Protecting and Enhancing Aquatic and Riparian Habitat and Ecosystems

Protecting and enhancing aquatic and riparian habitat and ecosystems may include: support for research and education programs that encourage protection of aquatic and riparian ecosystems; support for comprehensive and community planning efforts that incorporate watershed protection; and support for habitat improvement projects that will benefit water quality.

STREAM AND RIPARIAN ECOSYSTEM RECOMMENDATIONS

1. Conduct a study to monitor summer season stream temperatures along the Schoharie Creek and associated impacts on fisheries. Study will assess if cold water fish communities are thermally limited, and locate areas where habitat improvements might mitigate these impacts, and areas of thermal refuge that may need protection.

3. Review existing water quality data and identify, to the extent possible, the most significant water quality impairments.

4. Identify locations of potential water quality impairments including; sources of pollution from upland areas and within the stream channel, such as significant glacial lake clay exposures, and sources of contaminants from road runoff and households, and make prioritized recommendations for their mitigation.

5. Characterize the status of stream ecosystem health utilizing existing fish and insect population data, and outlining the general threats to ecosystem health and integrity.

6. Conduct a watershed aquatic habitat study including; mapping habitats and associated characteristics throughout Schoharie Creek, characterization of fish species presence or absence in those habitats, establish target fish community structure based on regional and historic fish community data, and make recommendations for improvement of habitat for target community.

7. A habitat assessment should be conducted in the Schoharie Creek and major tributaries, with particular attention paid to thermal refuge for cold water fish.

STREAM AND RIPARIAN ECOSYSTEM ASSESSMENT AND ENHANCEMENT					
Action Item	Partners	Description	Funding	Status	
	NYCDEP,	DEC and Partners proposed to design and build a brook trout			
	NYSDEC,	fishing area along Hunter Brook in the West Kill. DEC previously			
	GCSWCD,	conducted brook trout studies in the reach. In 2018, GCSWCD	USFWS,		
	TU, SWAC,	conducted the topographic survey of the reach. Currently in design	DEC,		
Fisheries Project	USFWS	phase with construction scheduled for 2019.	SMIP	Active	

WATERSHED PROTECTION AND COMMUNITY PLANNING RECOMMENDATIONS

1. Establish and maintain a comprehensive program that supports localized efforts and mobilization of the public for stream stewardship and the coordination of agencies, interest groups, municipalities, and stakeholders in community planning and watershed protection.

2. Watershed municipalities should evaluate their existing land use regulations, and adopt provisions which will protect stream corridor resources including wetlands, floodplains and floodways and provide additional local review for proposed development in these special areas.

3. A watershed-wide evaluation of regulations, including ordinances and zoning laws, should be undertaken. The evaluation should seek to identify regulatory gaps and determine if the current laws and ordinances adequately protect the watershed and encourage municipalities to update their regulations as needed.

4. Establish and support a Project Advisory Committee consisting of representatives of all significant stakeholder groups to coordinate the implementation of stream management plans.

5. Watershed municipalities should evaluate local ordinances such as comprehensive plans, zoning regulations, site plan review laws, subdivision laws and floodplain ordinances to determine if adequate consideration is given to riparian buffer impacts.

6. Watershed communities should integrate the evaluation of stormwater impacts on stream systems as they develop and implement comprehensive stormwater management plans which will protect water quality and reduce impacts on stream morphology.

7. Identify locations of potential water quality impairments including; source of pollution from upland areas and within the stream channel such as significant glacial lake clay exposures, and sources of contaminants from road runoff and households, and make prioritized recommendations for their mitigation.

WATERSHED PROTECTION AND COMMUNITY PLANNING						
Action Item	Partners	Description	Funding	Status		
Mountain Top Arboretum Education Center Rain	GCSWCD, NYCDEP,	This project will support the design of rain gardens that will capture and slow runoff and enable water filtration. The rain gardens are part of a larger project to build a year round Education Center at the Mountain Top Arboretum, a public garden that provides recreational and educational opportunities for residents and visitors to the Catskill Mountains. Design of the rain garden is complete, on-site design in-put will continue				
Garden Design	MTA	during project implementation in 2018-2019.	SMIP	Active		
		This project proposal involves installation of the rain gardens associated with the new MTA Education Center. The rain gardens will capture and slow runoff and enable water filtration from the existing roads, the new parking area and the Education Center itself. Native plants will be planted in rain gardens and create habitat for wildlife while also providing an educational				
Mountain Top Arboretum Education Center Rain Garden Implementation	GCSWCD, NYCDEP, MTA	opportunity; staff and volunteers will teach visitors about water runoff, water quality, planting techniques for a rain garden and the importance of the watershed.	SMIP	Active		

F. Enhancing Public Access to Streams

Enhancing public access to streams may include: support for projects that improve the quantity and quality of public stream access and enhance stream-based recreational opportunities; and support for projects that provide water resource educational materials at public access points. These recommendations incorporate community development efforts into stream management.

ENHANCING PUBLIC ACCESS TO STREAMS RECOMMENDATIONS

1. Public access for fishing should be enhanced along the Schoharie Creek stream corridor. Additional public access, as well as improvements to parking and access trails, is representative of the type of activities that may be possible.

2. Investigate opportunities to develop multi-use, low impact trail systems along the stream corridor.

ENHANCING PUBLIC ACCESS TO STREAMS							
Action Item	Partners	Description	Funding	Status			
Windham Multi- Use Trail System – Public Access	NYCDEP, GCSWCD, WARF	The Windham Multi-Use Trails are for non-motorized uses intended to provide public access to the Batavia Kill, provide connectivity between residential, business and activity centers in the Town of Windham. The proposed will construct a streamside connector trail that will link the existing multi-use recreational trail system to a public access point along the Batavia Kill in the hamlet of Maplecrest providing low impact public access to the stream. Components of the project include footbridges along the trail and signage.	SMIP	Active			
Hunter Branch Rail Trail	NYCDEP, GCSWCD, Town of Hunter	The proposed project with the Hunter Area Trail Coalition (HATC) will construct a pedestrian bridge on the former Hunter Branch Railroad that used to service the Village of Hunter from the Ulster and Delaware Railroad. The bridge will span Clove Creek, a small tributary to the Schoharie Creek. Project is contingent on the award of anticipated grants from other organizations.	SMIP	Active			
Huntersfield	NYCDEP, GCSWCD, Town of	The Huntersfield Creek Falls Trail is a 1-mile loop trail. The Phase 1 and 2 trails were laid out by the NY-NJ Trail Conference. Phase 1 will traverse an old farm field and wooded area that borders the Huntersfield Creek. The Town of Prattsville is currently working with the Catskill Mountain Club, the Catskill Center for Conservation & Development, the Pratt Museum, and the Huntersfield Church to bring Phase 1 to completion. Phase 2 will connect to the neighboring Pratt Rock park. The proposed project will construct a boardwalk, small foot bridge and interpretative kiosk, and trail					
Creek Falls Trail	Prattsville	signage.	SMIP	Active			

STREAM ACCESS EDUCATION AND OUTREACH RECOMMENDATIONS

1. Develop an interesting, hands-on display and accompanying presentation that could travel with staff or volunteers to public places. Include the definition of a watershed, how people affect the watershed in their daily lives, the importance of a healthy watershed and what they can do to help improve water quality.

2. At public stream access sites, provide educational materials, such as signage, that may lead to an increased stewardship ethic for the stream.

Appendix A: Summary of Completed Projects May 2007 – May 2019

PROGRAM AD	PROGRAM ADMINISTRATION						
Action Item	Partners	Description	Funding	Status			
		The GCSWCD and NYCDEP worked with NYSDEC to evaluate					
		alternatives and to offer training to address the complexity of					
		achieving turbidity control during construction. Two staff					
		members have been trained as Certified Professional Erosion and					
		Sediment Control Specialists, one has been trained as a Certified					
		Professional in Stormwater Quality and the majority of staff were					
		trained as part of the NYSDEC 4-hour erosion and sediment					
		control certification. GCSWCD is also qualified to teach the 4-					
	GCSWCD,	hour E/S control certification. GCSWCD purchased dewatering					
Restoration	NYCDEP,	equipment for stream projects and routinely prepares stormwater	NYCDEP/	Completed			
Project Permits	NYSDEC	pollution prevention plans for all size projects.	GCSWCD	2007			
		To manage the many projects and priorities in the action plan, the					
		GCSWCD needs staffing and resources to provide overall project					
		administration. In 2007, a staffing plan was developed along with					
Program		a new intergovernmental agreement between GCSWCD and					
Administration	GCSWCD,	NYCDEP that began in January 2009 and will fund watershed	NYCDEP/	Completed			
Staffing Plan	NYCDEP	activities through January 2014.	GCSWCD	2007			
		The GCSWCD and NYCDEP collaborated to establish a project					
		office within the Schoharie Watershed. The GCSWCD and WAP					
		identified and secured a Mountaintop project office in					
		Tannersville. The office is used by various local, regional, and					
		state committees working on watershed protection (e.g. Schoharie					
	GCSWCD,	Watershed Advisory Committee, subcommittees of the SWAC,					
	GCWAP,	Mountaintop Supervisory & Mayors Association, WOH Education	NYCDEP/	Completed			
Program Office	NYCDEP	& Outreach committee, etc.).	GCSWCD	2008			
		To successfully implement a multi-year riparian buffer program it					
		was necessary to work with NYSDEC, USACOE, and NYCDEP					
	GCSWCD,	to develop a general permit to allow for rapid planning and					
	NYCDEP,	installation of riparian buffers. The general permit applies to					
Riparian Buffer	NYSDEC,	minor (less than 300 ft.), short-term impacts such as, bank	NYCDEP/	Completed			
General Permit	USACOE	preparation and planting.	GCSWCD	2009			
		Completed an RFP process to develop a list of "pre-qualified"					
General		contractors for work including but not limited to, installing					
Contracting	GCSWCD,	stormwater management practices, drainage improvements, and	NYCDEP/	Completed			
Specification	NYCDEP	stream projects.	GCSWCD	2009			
		All Greene County municipalities within the Schoharie Basin and					
	G 1 1 ·	sub-basins (Batavia Kill, East Kill and West Kill watersheds) and					
	Schoharie	the Town of Conesville (Manor Kill) have adopted the relevant					
	Basin	SMPs and signed Memoranda of Understanding (MOU) with					
	Municipalities,	GCSWCD and SCSWCD, respectively. Annual reviews occur					
	Conesville,	with the municipalities per the MOU and provide an update on		Completed

STREAM RESTORATION AND STABILIZATION						
Action Item	Partners	Description	Funding	Status		
		Windham- Batavia Kill: a NYS DOT Article 15 stream				
		disturbance permit was flagged by DEC Region 4 for potential				
		inclusion of a natural channel design approach. The project,				
	NYCDEP,	designed and implemented by GCSWCD, established a	NYCDEP/			
Holden Stream	GCSWCD	geomorphically appropriate channel and floodplain bench and	GCSWCD,	Completed		
Restoration	NYSDOT	included riparian plantings which restored floodplain function.	NYSDOT	2007		
		Town of Prattsville- Batavia Kill: GCSWCD/NYCDEP				
		completed a full geomorphic based restoration of a +/- 1800 foot				
		reach on the lower Batavia Kill. The project addressed severe				
Conine Farm Stream	NYCDEP,	slope instability, reduced sediment loading and protected private	NYCDEP/	Completed		
Restoration	GCSWCD	property.	GCSWCD	2008		
		Town of Hunter- Esopus Basin: repairs were made on the				
		Lanesville Demonstration Stream Restoration Project. Most				
		adjustments were associated with gullying on a high slope failure				
		caused by poor drainage on the terrace above the slope, which				
Lanesville Stream		had not been addressed as part of the restoration project. Other		~		
Restoration Project	NYCDEP,	adjustments were made in rock vane elevations and additional	NYCDEP/	Completed		
Repairs	GCSWCD	bioengineering was added to mitigate gullying.	GCSWCD	2008		
		Repairs to a restoration project GCSWCD implemented in 2000.				
		The April 2005 flood damaged two dewatering wells which then				
		failed to relieve artesian conditions and a mud boil returned,				
D 1 4 4 H 11		causing chronic turbidity. GCSWCD modified the damaged rock				
Broadstreet Hollow		structures and hired a well drilling subcontractor to attempt to				
Stream		rehabilitate the dewater wells. The subcontractor found the well				
(BSH) Restoration	NUCDER	heads had broken and couldn't be rehabilitated. After reviewing	NWCDED/	G 1 (1		
Project	NYCDEP,	all options, a decision was made to abandon the wells and	NYCDEP/	Completed		
Repairs	GCSWCD	monitor the projects stability.	GCSWCD	2008		

	1			
		Town of Jewett- East Kill: excessive erosion, following 2005		
		and 2006 floods, caused damage to project grading and rock		
		structures, including 4 rock vanes and 2 cross vanes. The site		
		was originally vegetated by Conservation Reserve Enhancement		
		Program (CREP), but the seedlings never became established,		
		limiting project success. This restoration included: removal or		
		modification of damaged rock and cross vanes, treatment of the		
		back channel area to reduce frequency of flows in the back		
		channel and promote use of primary channel, bank grading,		
		vegetative stabilization to reduce erosion, and establishment of		
		riparian buffer along restored reach. Also, a bankfull bench was		
		added, 1,179 larger trees were planted, willow stakes and	NYCDEP/	
Faber Farm Stream	NYCDEP,	approximately 1,000 feet of willow fascines were installed, along	GCSWCD,	Completed
Restoration	GCSWCD	with many shrubs, sedges, and herbaceous seed.	ACOE	2008
		Town of Ashland- Batavia Kill: GCSWCD completed planting		
		on the streambanks and floodplains at the lower end of the		
		project reach. Also, compensatory wetland areas were planted		
		with appropriate species. Limited site cleanup work on		
Ashland Connector	NYCDEP,	access/staging areas was completed, and the project was	NYCDEP/	Completed
Reach	GCSWCD	surveyed as part of routine project monitoring schedule.	GCSWCD	2008
		Village of Hunter: stabilization of approximately 120 feet of high		
		stream bank to protect infrastructure and private property.		
		Project includes stacked and pinned riprap and vegetated beds.		
		The GCSWCD and NYCDEP also added additional riparian		
		buffer plantings on the opposite bank. Additional plantings		
Schoharie Street	NYCDEP,	including balled and burlapped river birch trees, were added fall	NYCDEP/	Completed
Stabilization	GCSWCD	2009.	GCSWCD	2009
Stabilization	GCSWCD		GCSWCD	2009
		Town of Lexington: completed a full geomorphic restoration of		
		approximately 2,400 linear feet of stream on the West Kill in		
		Spruceton Valley. The site had significant bank failure and clay		
West Kill Restoration	NYCDEP,	exposures in bank and stream bed. Wetland delineation,	NYCDEP/	Completed
Project, Long Road	GCSWCD	archaeological investigation and final survey of site conducted.	GCSWCD	2009
			CWC	
		Town of Prattsville: GCSWCD led the CWC Stream Program	Stream	
	NYCDEP,	streambank projection project. Engineering services were	Corridor	
	GCSWCD,	contracted for this project; design plans and specifications have	Protection	Completed
Oakwood Pistol Club	CWC	been submitted for permit, and construction completed.	Grant	2009
		Primarily a CWC project with GCSWCD assistance. The project		
	NYCDEP,	provided for the removal of failed sheet piling, armoring of the	CWC,	
Windham Golf Course	GCSWCD,	toe and sloping of the bank, and planting of approximately 155	NYCDEP/	Completed
Streambank Project	CWC	feet of streambank.	GCSWCD	2009
		Town of Windham- Batavia Kill Tributary: removed mortared	JUDWUD	2007
		stone walls that confined a tributary and restored the stream to a		
		natural shape and meander pattern. Floodplain grading was		
		performed and the site was seeded with wetland and riparian		
		seed mixes. GCSWCD hosted a student planting with three		
		schools to install 1,584 herbaceous plugs, 340 willow stakes, 250		
		trees and shrubs, and 7 willow fascines. The project was		
		designed to restore wetland functions and approximately 700 feet	NYCDEP/	
Sugar Maples Stream	NYCDEP,	of stream that was historically channelized and confined by	GCSWCD,	Completed
Restoration	GCSWCD	mortared stone walls.	ACOE	2010
		A bankfull bench of approximately 1,200 feet was constructed		
		and 3,127 feet of the streambank were re-vegetated. A rock	NYCDEP/

Wright Stream Bank Stabilization/ Riparian	NYCDEP,	The previously constructed project was modified and enhanced with additional vegetative treatments in 2011 and monitoring	NYCDEP/	Completed
Project Enhancement	GCSWCD	initiated in 2012.	GCSWCD	2011
Vista Ridge Floodplain Restoration	NYCDEP, GCSWCD	This project improved the immediate project area and the aggraded reach upstream, by reducing a backwater condition at the Vista Ridge bridge. The project also enhanced the riparian buffer, reduced the risk of failure of Vista Ridge and Colgate Lake Roads, reduced erosion of silts and clays, and provides for improvement of the habitat value of the reach.	NYCDEP/ GCSWCD, ACOE	Completed 2011
Holden Stream Restoration Project	NYCDEP, GCSWCD	Phase 1 of the project was completed in 2011; continued construction was postponed due to Hurricane Irene. Project construction completed in 2012. The project included streambank and channel excavation to achieve stable geometry, installation of in-stream stabilization structures and a variety of bioengineering techniques along 3,500 feet of stream channel. Over 6,000 trees were planted along the restored stream channel.	NYCDEP/ GCSWCD	Completed 2011-2013
Windham Country Club Repairs	NYCDEP, GCSWCD	Windham- Batavia Kill: There were significant damages sustained at the Windham Country Club. Topographic data was collected to support cost, material and labor estimates for implementation of the repair work. GCSWCD provided technical support to the project due to the extensive damage that occurred along the stream corridor.	NYCDEP/ GCSWCD	Completed 2012
East Kill Restoration at Apple Hill	NYCDEP, GCSWCD	Project components included the realignment and resizing of 3,500 feet of channel, the installation of 23 rock structures, and installation of extensive bioengineering treatments and riparian plantings over the 11 acre site. These efforts will improve water quality, reduce risk to humans and property, reduce erosion and excessive sediment loading, restore floodplain function, and improve aquatic and terrestrial habitat.	NYCDEP/ GCSWCD, SMIP, ACOE, EWP	Completed 2012
NYS Route 42 West Kill Slope Failure	GCSWCD NYCDEP NRCS	Town of Lexington: The project addressed a large slope failure along a 1,400 foot reach of the West Kill, just downstream of the Pushman Bridge on NYS 42. The project included stream bank and channel excavation, and the installation of in-stream stabilization structures to achieve stable geometry. Practices include rock riffles, random boulder clusters, log boulder revetment and dry rock riprap with willow stakes to establish an armored flood plain bench at the toe of the slope, upper portions of the slope were hydroseeded and staked, and an as-built survey and plans have been prepared.	NYCDEP/ GCSWCD, EWP	Completed 2013
Conine Project Repairs	NYCDEP, GCSWCD	Town of Prattsville: The purpose of this work was to repair a project that was damaged during Irene in 2011. The repair project measured approximately 2,200 linear feet in length, with a disturbance area of 11 acres. Extensive earthwork required to restore original grades, and included excavation and placement of over 52K cubic yards of material. The project included the repair and reconstruction of 5 j-hook vane structures, two cross vanes, and a constructed riffle. Biotechnical measures taken included live staking and fascines, seeding native riparian and wetland seed mixes, and developing a 7.1 acre riparian zone.	FEMA NYCDEP/ GCSWCD	Completed 2013

[r	F	1	
		Town of Ashland- Batavia Kill: The purpose of the project was		
		to repair a portion of a project constructed in 1999 that sustained		
		damage during Irene in 2011. Damages included streambank		
		erosion, structural damage to rock structures, channel migration		
		and land loss, and excess sedimentation. Earthwork was		
		completed to restore original grades. The reconstruction of two j-		
		hooks and repair of one cross vane provided channel grade		
		control, stream bank stabilization, and habitat enhancement.	FEMA

STREAM STEWARDSHIP EDUCATION AND OUTREACH				
Action Item	Partners	Description	Funding	Status
What is turbidity and why is it important?	GCSWCD/ NYCDEP	Workshop held that provided an overview of what turbidity is, and the impact it has on the Schoharie Basin.	NYCDEP/ GCSWCD	Completed 2007
Watershed Tours	GCSWCD/ NYCDEP	Watershed tours provide an opportunity for local officials and interested basin residents to observe best management practices used in stream stewardship and management throughout the watershed. The tours foster and improved understanding of stream protection efforts and implementation projects.	NYCDEP/ GCSWCD	Completed Annually 2007-2010
Batavia Kill Stream Celebration	GCSWCD/ NYCDEP	Annual event promoting the wise use of our natural resources as they relate to water quality and ecosystem functions. Interactive exhibits, educational displays, and activities promoting understanding of the environment engage those of all ages.	NYCDEP/ GCSWCD, Ashland, CWC	Completed Annually 2007-2011
Educational Workshops	GCSWCD/ NYCDEP	Education, built into Summits and Tours, target elected and appointed officials, planning boards, code enforcement officers, highway department staff, and streamside property owners.	NYCDEP/ GCSWCD	Completed Annually 2007-2019
Watershed Summits	GCSWCD/ NYCDEP	Watershed conferences held to provide local decision makers and officials educational classes and networking opportunities around watershed protection. All eleven communities within the basin are represented by the vast and diverse number of attendees.	NYCDEP/ GCSWCD	Completed Annually 2007-2019
Websites	GCSWCD/ NYCDEP	Although websites require continuous updating, the www.catskillstreams.org and www.gcswcd.com are established sites that are used to promote project updates and share information on watershed protection issues.	NYCDEP/ GCSWCD	Completed 2007, 2010, 2014
Program Office	GCSWCD NYCDEP	GCSWCD and WAP secured a Mountaintop project office in Tannersville which is used by various local, regional, and state committees working on watershed protection.	NYCDEP/ GCSWCD	Completed 2008
Schoharie Watershed Advisory Committee	GCSWCD/ NYCDEP/ Watershed Municipalities	SWAC meets regularly throughout the year, developed program materials to initiate a stream management plan implementation funding application process, and identified initial projects for implementation. Establishment of local representation and implementation of the SMP, with technical agency support, has been accomplished.	NYCDEP/ GCSWCD	Completed 2008
ESC Workshop	GCSWCD NYCDEP	GCSWCD sponsored three Construction Erosion and Sediment Control Training Courses that were attended by approximately 230 people from the Schoharie basin. Participants included watershed developers, planners, code enforcement officers, regulators and contractors. This course focused on the review of new state construction permit, the requirements of stormwater pollution prevention plans, and the proper installation of erosion and sediment control practices. This continued	NYCDEP/ GCSWCD	On-going 2008-2017

2019-2021

		with workshops in 2015 and 2017. Courses are offered approximately every three years.		
Manor Kill Environmental Study Team,Stream Management Implementation	Schoharie River Center	Experimental, hands on environmental education and stream monitoring program for youth ages of 13 - 18. Youth members learn specific skills, develop and master abilities in environmental assessments, field research projects and community education activities. Members also participated in a riparian planting along Manor Kill in 2011.	SMIP	Completed Annually 2009-2011
Schoharie Watershed Week	GCSWCD/ NYCDEP/ Watershed Municipalities	A number of events scheduled to educate and engage local community members in watershed programs and stewardship activities. Intended to be an annual event, but replaced with Schoharie Watershed Month in 2011.	SMIP	Completed 2010
Rain Barrel Workshop	CCE, GCSWCD, NYCDEP	Workshop took place during Schoharie Watershed Week in May 2010 and Schoharie Watershed Months in 2011 & 2012. Watershed landowners took part in building their own rain barrels.	SMIP	Completed 2010-2012
Mountain Top Arboretum Wet Meadow- Interpretive Kiosk, Brochures, & Historic Pump House Repair	Mountain Top Arboretum	A kiosk was installed and brochures were developed to describe the wet meadow including the historical background of the historic pump house, an explanation of the site's hydrology, and other information about wetland plants and wildlife.	SMIP	Completed 2010
SWAC and Schoharie Watershed Week Logos	GCSWCD/ NYCDEP/ SWAC	Logos were developed for the Schoharie Advisory Committee and Watershed Week.	SMIP	Completed 2010
Schoharie Watershed Months	GCSWCD, NYCDEP, SWAC	Schoharie Watershed Month engages watershed communities and organizations in hands-on activities to learn about the watershed and its resources. Various activities, workshops and family events are organized each May by host communities and organizations that promote awareness and protection of streams and their watersheds.	SMIP	Completed Annually 2011-2018
CD Lane Family Day	GCSWCD, NYCDEP, Community of Windham Foundation	Activities included Trout Unlimited fly fishing demonstrations, water quality testing activities with the Schoharie River Center, nature hikes, kayak demonstrations, and a water-focused craft activity. These activities encourage responsible use of water and nearby land areas. There were approximately 60 participants.	Community of Windham Foundation (COWF)	Completed 2011
Identify Existing Resources	GCSWCD, NYCDEP	GCSWCD identified and cataloged existing resources that are currently available. The website was revamped in 2011, to provide web-based documentation of existing resources and links to additional resources. An outdoor classroom was designed and constructed at	NYCDEP/ GCSWCD	Completed 2011
Mountain Top Arboretum Outdoor Classroom Design	GCSWCD, NYCDEP, Mountain Top Arboretum	the arboretum. It accommodates approximately 45 people for year-round outdoor programming on a range of ecological and natural history topics relating to the watershed.	SMIP	Completed 2011

Water Workshop	Mrs. Puddle Duck's, GCSWCD, Catskill Center, Hunter Foundation, NYCDEP	As part of Schoharie Watershed Month, the Catskill Center for Conservation & Development and the Hunter Foundation supported a water workshop targeting preschoolers and their families. To workshop provided an opportunity for participants to discover what is in our stream and why it is important to protect them. As part of Schoharie Watershed Month, Windham Day	SMIP, Catskill Center, Hunter Foundation	Completed 2014
Windham Day of the Batavia Kill	SWM Committee, GCSWCD, NYCDEP	on the Batavia Kill was held at the Windham Path property. Attendees had the opportunity to participate in the COWF Pat Meehan Memorial Scholarship Walk, plant identification walks, and learned about local organizations that promote outdoor and community resources.	SMIP, Cowf	Completed 2014
The Gilboa Ancient Forest	SWM Committee, GCSWCD, NYCDEP	During Schoharie Watershed Month, the Gilboa Ancient Forest lecture was presented by Kristen Wyckoff of the Gilboa Historical Society (GHS). Participants learned about the oldest known forest on earth and saw fossilized tree trunks.	SMIP	Completed 2014
Guided Bus Tour of the Schoharie Reservoir	SWM Committee, GCSWCD, NYCDEP	As part of Schoharie Watershed Month, Gerry Stoner and Diane Galusha, area historians, presented a Guided Bus Tour of the Schoharie Reservoir. Participants took a scenic tour around the reservoir and explored this history of the former valley and the creation of the Gilboa Dam.	SMIP	Completed 2014
The Stream of Life Student/Amateur Watershed Art Exhibit	SWM Committee, GCSWCD, NYCDEP	The artwork of local students and amateur artists was on display at the Kaaterskill Fine Arts Gallery in Hunter, NY. The artwork theme was The Stream of Life. An opening reception was held and the exhibit was on display for the month of May.	SMIP	Completed 2015
Trout Release	SWM Committee, GCSWCD, NYCDEP	During Schoharie Watershed Month, a trout release and macroinvertebrate study were held at Dolan's Park in Hunter, NY. Participants also have the opportunity to learn about flycasting and tying. As part of Schoharie Watershed Month, Trout Unlimited	SMIP	Completed 2015
Changing Trout Habitat in the Upper Schoharie Creek	TU, SWM Committee, GCSWCD, NYCDEP, Platte Clove Community	As part of Schoharie Watershed Month, I rout Unlimited supported the workshop, <i>Changing Trout Habitat in the</i> <i>Upper Schoharie Creek.</i> Walt Keller, a fisheries biologist, and a panel of speakers explored the factors that influence stream health and fish populations. The workshop was held at the Platte Clove Neighborhood Center in Hunter, NY.	SMIP/CSBI	Completed 2015
Guided Paddle on the Schoharie Reservoir	SWM Committee, GCSWCD, NYCDEP, Catskill Outback Adventures	Catskill Outback Adventures led a guided paddle on the Schoharie Reservoir beginning at Snyder's Cove. This trip was part of Schoharie Watershed Month.	SMIP	Completed 2015
Aquatic Invertebrates Workshop for Children	SWM Committee, GCSWCD, NYCDEP	As part of Schoharie Watershed Month, an Aquatic Invertebrates workshop was held in the Village of Hunter, NY. This after school program taught students about dragonflies, damselflies, and other aquatic insects and animals that play important roles in the watershed.	SMIP	Completed 2015
Interpretive Watershed Hike, Bearpen Mountain	SWM Committee,	Peter Manning led a 7-mile interpretive watershed hike of Bearpen Mountain as part of Schoharie Watershed Month.	SMIP	Completed 2015

	GCSWCD, NYCDEP			
The Schoharie Basin and It's Ice Age History	SWM Committee, GCSWCD, NYCDEP	<i>The Schoharie Basin and It's Ice Age History</i> was presented by Bob and Johanna Titus. They told the story of how glaciers shaped the Schoharie Basin and created its most scenic views. This lecture was held at the Mountaintop Historical Society in Haines Falls, NY as part of Schoharie Watershed Month.	SMIP	Completed 2015
Town of Lexington Watershed Awareness Workshops	Town of Lexington	A series of four educational workshops for children in the Town of Lexington. The proposed workshops will teach local children, using hands-on experiences, about the insects and animals that play important roles in the watershed, and the role that streams play in the environment.	SMIP	Completed 2015
Opening Student/ Amateur Art Exhibit	NYCDEP/ GCSWCD	Students from schools around the mountaintop displayed their films, sculptures, photographs, and other artwork for the "Now Streaming: Life in the Schoharie" art show. Exhibit ran through the month of May. This exhibit was on display at the Doctorow Center for the Arts during Schoharie Watershed Month.	SMIP	Completed 2016
"RiverWebs" Film Showing	NYCDEP/ GCSWCD	"A true story about life, death, science, and streams." This documentary follows the life and work of Japanese ecologist, Dr. Shigeru Nakano. The documentary was shown at the Mountain Top Library as part of Schoharie Watershed Month.	SMIP	Completed 2016
Riverkeeper Sweep:	NYCDEP/	The NYC Department of Environmental Protection (NYCDEP) and the Greene County Soil & Water Conservation District (GCSWCD) organized a tree planting on Windham's Batavia Kill (at South Street) on Saturday, May 7, 2016 for the 5 th Annual Riverkeeper Sweep, a day of service for the Hudson River. This		Completed

Technical	Highway	forwarded to the Village of Hunter Highway Department in	NYCDEP/	Completed
Assistance	Department	March 2011.	GCSWCD	2011

Partridge Road Culvert Replacement Mitchell Hollow Road (CR 21) Stormwater Sewer	GCSWCD, NYCDEP, Ashland Highway Department GCHD, GCSWCD, NYCDEP,	The culvert under B.G. Partridge Road, in the Town of Ashland, was undersized which contributed to roadway flooding during high flows. The culvert was also perched, which presented a barrier for fish passage. GCSWCD worked with the Town of Ashland Highway Department to design a properly sized culvert and oversee the installation of this culvert. A grant was approved by SWAC/SMIP to offset the costs of upgrading the culvert to a larger size. Design, permitting and construction were completed in the summer of 2011. Installed water quality treatment components associated with 370' of stormwater sewer with catch basins along Mitchell Hollow Road. Project mitigates stormwater flooding in area	NYCDEP/ GCSWCD, SMIP SMIP, NYCDEP/ GCSWCD	Completed 2011 Completed 2011
Upgrade	Town of Windham	along NYS Route 23. Project completed without SMIP funds.	SMP Contract	2011
Griffin Road Culvert Replacement	GCSWCD, NYCDEP, Jewett	The existing culvert under Griffin Road in the Town of Jewett was undersized and washed out during the flooding caused by Hurricane Irene. GCSWCD and Delaware Engineering provided design plans, permits, specifications and contract documents for bidding, funding, construction management and administration for the culvert replacement. The new culvert was designed to withstand the 100-year runoff event and included a habitat friendly three sided precast concrete structure with wing walls at the inlet and outlet. Road improvements and stream enhancements, including an upstream cross vane, were installed.	FEMA NYCDEP/ GCSWCD	Completed 2012
County Route 6 Slope Failure	GCSWCD GC Highway Dept. NYCDEP NRCS EWP	This project included stabilization of the slope failure along County Route 6 and the West Kill in Lexington. Practices installed included the use of rock riffles and sheet piling to elevate stream profile adjacent to the slope failure, to help buttress the failing slope and to provide grade control. The installation of rock revetment to protect the toe of the slope from erosion and stormwater drainage in the area of the failure to help maintain moisture levels in the soil profile was completed.	GCSWCD GC Highway Dept. NYCDEP NRCS EWP, ESD	Completed 2014
Hunter Foundation	GCSWCD, NYCDEP, Hunter Foundation	The GCSWCD worked with the Hunter Foundation to design and implement a demonstration project integrating stormwater management in an area with limited space. Innovative methods including, porous gravel parking, bioswales and rain gardens, were used to meet water quality treatment standards for runoff from roofs and parking.	SMIP	Completed 2014
Glen Avenue Culvert Upgrade	Village of Hunter Highway Department, GCSWCD, NYCDEP	The GCSWCD worked with the Village of Hunter Highway Department to design and properly size the culvert under Glen Avenue near the entrance of Camp Loyaltown. Design of this project was partially funded by the Schoharie Watershed Stream Crossing/Culvert Design SMIP funding. Installation was completed in 2015 with a buried bottom for improved habitat. Supplemental plantings were installed in 2016.	SMIP, ESD, FEMA	Completed 2016
Cranberry Road Culvert Upgrade	Town of Hunter Highway Department, GCSWCD, NYCDEP	The GCSWCD worked with the Town of Hunter Highway Department to design, properly size and oversee the installation of this culvert. Design of this project was partially funded by the Schoharie Watershed Stream Crossing/Culvert Design SMIP funding. The upgrade culvert was installed in 2016 and will be able to convey 100-year storm flows, reduce negative impacts to water quality and improve aquatic habitat and fish passage.	SMIP, ESD, FEMA	Completed 2016

South Gilboa Road Stormwater Mitigation Project	SC Department of Public Works, SCSWCD, GCSWCD, NYCDEP	This project replaced a culvert that conveys stream flow from an unnamed tributary to the Schoharie Reservoir under South Gilboa Road. The SCSWCD worked with the Schoharie County Department of Public Works, NYCDEP and Milone and MacBroom to design and install a culvert that will provide for the appropriate alignment and structure to convey flow and reduce turbid discharges directly to the reservoir.	SMIP, SCDPW, NYCDEP/ GCSWCD Schoharie Contract	Completed 2016
Critical Area Seeding	GCSWCD, NYCDEP, Schoharie Basin Municipalities	GCSWCD continued to partner with municipal highway departments within the watershed to provide critical area seeding for roadside ditches and slopes using the district's hydroseeder and power mulcher. GCSWCD provided seeding assistance in the Towns of Hunter, Ashland, Jewett, and Windham in 2016.	NYCDEP/ GCSWCD	Completed 2016
Street Sweeper with Vacuum	Highway Superintendents Subcommittee, NYCDEP, GCSWCD	After the winter season, highway crews sweep road abrasives using different machines. Greene County owns a sweeper with a vacuum that is effective at collecting leftover sand material and cleaning out stormwater structures. Given its limited availability, a second sweeper was purchased for the mountaintop communities to allow more road miles to be cleaned and maintained across the mountaintop, thereby reducing the amount of abrasives washing into ditches and waterways.	CWC, SMIP	Completed 2017
County Route 2 Culvert Upgrade, Little West Kill	GCHD, GCSWCD, NYCDEP, Town of Lexington	The project replaced a culvert that conveys stream flow from the Little West Kill under County Route 2. The previous culvert alignment contributed to localized streambank instabilities and discontinuity of sediment transport. The replacement culvert will improve road stability, flow conveyance, sediment transport continuity, habitat connectivity and aquatic organism passage.	SMIP, NYCDEP/ GCSWCD, GCHD	Completed 2017
Critical Area Seeding	GCSWCD, NYCDEP, Schoharie Basin Municipalities	GCSWCD partnered with municipal highway departments within the watershed to provide critical area seeding for roadside ditches and slopes using the district's hydroseeder and power mulcher. GCSWCD provided 9.8 acres of highway seeding assistance in the Towns of Windham, Hunter, Jewett and Lexington in 2017.	NYCDEP/ GCSWCD	Completed 2017
Critical Area Seeding	GCSWCD, NYCDEP, Schoharie Basin Municipalities	GCSWCD partnered with municipal highway departments within the watershed to provide critical area seeding for roadside ditches and slopes using the district's hydroseeder and power mulcher. GCSWCD provided 12.7 acres of highway seeding assistance in towns within the Schoharie watershed in 2018.	NYCDEP/ GCSWCD	Completed 2018

Development	NYCDEP	implementation of the program.	NYCDEP	2008	

Plant Materials Program	GCSWCD, NYCDEP	This program supported enhancement and utilization of GCSWCD's own nursery at the Plant Materials Center, to supply plant material for various planting and seeding projects. The native seed program was initiated in 2008 Currently, seeds are collected by Greenbelt Native Plant Center and plants are grown to tubelings. One Nature Nursery picks up the tubelings and grows them out for an additional year. We continue to receive trees and shrubs annually each fall through this program.	GCSWCD, NYCDEP	Completed 2007-2018
Sugar Maples Riparian Buffer Project	GCSWCD, NYCDEP	Town of Windham- Batavia Kill: Treated invasive Japanese knotweed and then planted approximately 800 feet of riparian vegetation.	ACOE (WRDA)	Completed 2008
Vegetation Enhancements	GCSWCD, NYCDEP	Batavia Kill, West Kill, Schoharie Creek, and Manor Kill: Root Production Method (RPM) trees were planted at Big Hollow, Brandywine, and Ashland Connector Reach project sites. A certified herbicide applicator treated Japanese knotweed at Big Hollow, Carr Rd., Schoharie Ave. and Long Rd. project sites. DEP conducted monitoring of vegetative techniques on a majority of these projects. Vegetation enhanced projects in the developed with Greene County Highway, FEMA, at the County Route 13 culvert project, and a volunteer planting in Manor Kill behind the Conesville town hall.	GCSWCD, NYCDEP	Completed 2008
County Route 6	GCSWCD Greene County Highway Dept.	Town of Lexington- West Kill: Implemented vegetation stabilization methodologies at a site on the West Kill that was previously scheduled for all riprap. Along this site, a short section of Vegetation Reinforced Slope Stabilization (VRSS) was installed, and trees and shrubs were planted on the upper bank; willows were interplanted with the riprap.	GCSWCD, NYCDEP	Completed 2008
Deming Road Riparian Project	GCSWCD, NYCDEP	On this project, 723 trees and shrubs, along with 120 willow stakes, were installed on three contiguous parcels.	GCSWCD	Completed 2009
McRoberts Property Planting	GCSWCD, NYCDEP	GCSWCD has a 10 year landowner agreement for this property. Riparian Corridor Management Plan is complete. During this project, 50 trees and shrubs and 125 willow stakes were installed.	CSBI	Completed 2009
Manor Kill Grogan Property Planting	GCSWCD, NYCDEP	SCSWCD has a 5 year agreement for this property. Riparian Corridor Management Plan is complete. During this project, 54 trees and 500 sedge plugs were installed.	CSBI	Completed 2009
Kane Property Planting	GCSWCD, NYCDEP	GCSWCD has a 10 year landowner agreement for this property. Riparian Corridor Management Plan is complete. During this project, 116 trees and 250 willow stakes were installed.	CSBI	Completed 2009
Kastanis Property Planting	GCSWCD, NYCDEP	Catskill Streams Buffer Initiative Pilot: Obtained 5- year landowner agreement, completed a riparian corridor management plan and restored approximately 7.1 acres of streamside vegetation along the Batavia Kill, including hosting school groups in the effort and planting about 1,500 trees and shrubs.	CSBI	Completed 2009
Evergreen Planting	GCSWCD, NYCDEP	GCSWCD/NYCDEP worked with the landowner to develop a planting plan and to obtain a landowner agreement for the property. Project is located in the town of Hunter.	CSBI	Completed 2009
Silver Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. GCSWCD removed fence, graded 60 feet of streambank, planted 25 trees and shrubs, and installed 30 willow stakes in May 2010.	CSBI	Completed 2010
Grossman Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Installed a 50 foot riparian buffer and 198 trees and shrubs were plant along 300 feet in May 2010.	CSBI	Completed 2010

Bardfield Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Installed 432 trees and shrubs with 20 BYC students in a planting area of 700 feet long	CSBI	Completed 2011
Rivera Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. GCSWCD installed 506 trees and shrubs, 500 willow stakes, and 50 lbs. in two areas along the East Kill. Most trees were lost to post-flood management activities in the fall of 2011.	CSBI	Completed 2011
Slutzky Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Project involved installation of 793 trees and shrubs with 15 high school students from Gilboa-Conesville CSD. Planting area was 950 feet long and 50 feet wide.	CSBI	Completed 2011
Kelly Property Planting	GCSWCD, NYCDEP	GCSWCD has a 10 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Project involved installation of 94 trees and shrubs along 250 feet to create a 25 foot riparian buffer in the spring of 2011.	CSBI	Completed 2011
Cervini Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete and 275 trees and shrubs were installed.	CSBI	Completed 2011
Torsiello PropertyPlanting	GCSWCD, NYCDEP	Flooding, due to Tropical Storm Irene, caused woody debris jam on property. Stream channel was repaired by town highway department. GCSWCD has a 5 year landowner agreement for this property. CSBI installed 275 trees and shrubs.	CSBI	Completed 2011
Hegner Property Planting	GCSWCD, NYCDEP	This property is adjacent to Torsiello, where stream channel was repaired by the town highway department. GCSWCD has a 5 year landowner agreement for this property.	CSBI	Completed 2011
Manor Kill Gentile Property Planting	SCSWCD GCSWCD NYCDEP	SCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. 292 trees, 50 willow stakes, and 500 sedge plugs were installed in November 2009. 100 additional willow stakes were installed spring 2010.	CSBI	Completed 2010
Manor Kill Brandow Property Planting	SCSWCD, GCSWCD, NYCDEP	SCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete and 50 trees, 100 willow stakes/tubes, and sedge plugs were installed in spring 2010.	CSBI	Completed 2010
Manor Kill Quinn Property Planting	SCSWCD, GCSWCD, NYCDEP	SCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete and 100 trees, 80 willow stakes/tubes, and 100 sedge plugs were installed in spring 2010. Also, approximately 50-100 JKW plants were removed from the site.	CSBI	Completed 2010
Dodson/McCloskey Property Planting	GCSWCD, NYCDEP	GCSWCD has a 10 year landowner agreement for this property. Riparian Corridor Management Plan is complete and 300 trees, shrubs, and weed mats were installed in June 2010 to create a 100 foot wide riparian buffer along 300 feet of the East Kill. GCSWCD contracted Bevan Forestry to control a patch of Japanese knotweed; Aqua Master was used to inject 25 JKW stems.	CSBI	Completed 2010
Rappleyea Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete and 150 trees and shrubs were installed in June 2010.	CSBI	Completed 2010
Avella Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Installed 26 trees and shrubs in June 2010.	CSBI	Completed 2010
Brunsden Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Installed 54 herbaceous plugs, 22 willow stakes, 5 shrubs, and 2 trees in August 2010.	CSBI	Completed 2010

2019-2021

		and 35 feet wide. Many of the trees were lost to post-flood management activities in fall of 2011.		
Cole Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. The Riparian Corridor Management Plan is complete. A subcontractor was hired to grade 300 feet of streambank along the West Kill prior to the planting and then 225 trees and shrubs, 200 willow stakes and 300 feet of fascines were installed along 350 feet of the right streambank.	CSBI	Completed 2012
Manor Kill Colangelo Riparian Planting	SCSWCD, GCSWCD, NYCDEP	Riparian planting project on the Manor Kill in Conesville. A Riparian Corridor Management Plan has been completed for this property. In 2009, 354 trees were planted, 150 willow stakes and 500 sedge plugs were installed along 546 feet of stream. In 2010, 340 additional trees and 200 stakes were installed. In 2012, potted stock was planted along 900 feet of the left streambank.	CSBI	Completed 2012
Mayo Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete and 300 willow stakes were installed along 200 feet of streambank, 94 native trees and shrubs were installed, and 0.23 acres of streamside habitat was seeded.	CSBI	Completed 2013
Enochty Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. GCSWCD installed 30 willow stakes and 25 native trees and shrubs along 100 feet of stream in the fall of 2013.	CSBI	Completed 2013
Donnelly Riparian Project	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. GCSWCD installed 125 willow stakes and 117 native trees and shrubs along 250 feet of stream in the fall of 2013.	CSBI	Completed 2013
Wilkie Riparian Project	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. GCSWCD installed 75 willow stakes and 15 native trees and shrubs along 150 feet of stream in the fall of 2013.	CSBI	Completed 2013
Dodson/McCloskey Property Planting Phase 2	GCSWCD, NYCDEP	GCSWCD re-installed a 100 foot wide riparian buffer along 300 feet of stream including, 250 native trees and shrubs and 250 willow stakes in the fall of 2013.	CSBI	Completed 2013
Manor Kill Dahlberg PropertyPlanting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property and installed 50 native trees and shrubs and willow stakes along 150 feet of stream in 2014.	CSBI	Completed 2014
Police Anchor Camp (Windham Path) Riparian Project	GCSWCD, NYCDEP	Riparian planting project at multiple locations along tributaries of the Batavia Kill and the Windham Path. GCSWCD completed a Riparian Corridor Management Plan and has obtained a landowner agreement for this property. GCSWCD hosted a volunteer planting in 2013, installing 1,028 native trees and shrubs along 1,375 feet of stream. 2.41 acres were restored at three planting locations. GCSWCD removed a gravel berm 223 ft. long x 10 ft. wide x 4.5 ft. high and relocated 371 cubic yards of berm material outside 100 yr. floodplain prior to installing 350 trees to create a riparian buffer. Project area was graded and seeded with riparian mix. With an additional planting along a tributary that bisects the parcel, 460 native trees and shrubs were installed along 820 ft. of stream. 1.23 acres were restored in 2015. Project is complete.	CSBI	Completed 2015

Former Kastanis Property Planting Phase 2	GCSWCD, NYCDEP	Riparian planting project to reestablish a forested riparian buffer 100 feet wide along 1,200 feet of the Batavia Kill was planted in 2009, as a pilot project to restore approximately 7.1 acres of streamside vegetation. In 2015, GCSWCD obtained a land use and herbicide permit to reestablish a forested riparian buffer and treat Japanese knotweed. GCSWCD hosted a volunteer planting and installed 1,100 native trees and shrubs along 1,650 feet of stream, a total of 3.8 acres were restored. Japanese knotweed will require monitoring and follow-up treatment.	CSBI	Completed 2015
		A riparian planting to restore approximately 4,500 square feet of streamside vegetation along a Schoharie Creek Tributary in Hunter.		
Saenger Property	GCSWCD,	In 2015, a volunteer planting was hosted at the site; 120 native trees and shrubs and 20 willow stakes were installed along 137 feet of	CODI	Completed
Planting	NYCDEP	stream, 0.1 acre was restored.	CSBI	2015
	CONVOD	Restore approximately 300 linear feet of streamside vegetation along the East Kill. GCSWCD has a 5 year landowner agreement for this property. GCSWCD will install willow stakes along 300 ft. of streambank to reestablish vegetation that washed out in Irene		
Posch Riparian Planting	GCSWCD, NYCDEP	flooding. A riparian planting of 300 native trees and shrubs was installed in spring 2016.	CSBI	Completed 2016
South Street	GCSWCD,	Riparian plantings were installed to a length totaling approximately 1,000 feet, with buffer widths varying from 45 feet to 100 feet, covering an area of 1.15 acre, along the Batavia Kill in Windham. This volunteer planting project was a 2016 Riverkeeper Sweep event. Staff and volunteers will installed 563 native trees and		Completed
Riparian Planting	NYCDEP	shrubs.	CSBI	2016
Sawicki Property Grading and Planting	GCSWCD, NYCDEP	Restore approximately 4,500 square feet of streamside vegetation along a portion of the Schoharie Creek in Hunter. GCSWCD obtained a permit from DEC to grade less than 300 ft. of eroding bank. 35 riparian trees and shrubs were planted along with 180 willow stakes, 3 vertical bundles and 22 fascines to establish riparian vegetation along the left bank of the Schoharie Creek.	CSBI	Completed 2016
Prattsville Ball Field	GCSWCD, NYCDEP, Town of Prattsville	Riparian planting project to restore approximately 200 linear feet of streamside vegetation along the Batavia Kill just upstream of the confluence with the Schoharie Creek in Prattsville at the Everett Conine Memorial Field. Project is not feasible due to presence of Japanese knotweed. CSBI application form was never received. Riparian planting to restore approximately 200 linear feet of streamside vegetation along a Batavia Kill tributary in Hensonville	CSBI	N/A
Chase Property	GCSWCD,	in Fall 2017. Landowner is not interested in planting despite numerous outreach attempts. CSBI application form was never	CSBI	NI/A
Planting Freedman Planting	NYCDEP GCSWCD, NYCDEP	received. Restored 0.03 acre of streamside vegetation along a portion of the Stony Clove in Hunter. Planted 55 riparian trees and shrubs along 45 feet of streambank. Will monitor for Japanese knotweed and treat as needed.	CSBI	N/A Completed 2017
Pesciotta Planting	GCSWCD, NYCDEP	Restored 0.3 acre of streamside vegetation along a portion of the East Kill in East Jewett. Planted 195 riparian trees and shrubs along 193 ft. of streambank.	CSBI	Completed 2017
Simmons Planting	GCSWCD, NYCDEP	Restored 0.2 acre of streamside vegetation along a portion of the West Kill in Lexington. Planted 171 riparian trees and shrubs along 176 feet of streambank.	CSBI	Completed 2017

Drake Planting	GCSWCD, NYCDEP	Restored 0.7 acre of streamside vegetation along a portion of the Schoharie Creek in Lexington. Planted 412 riparian trees and shrubs along 362 feet of streambank.	CSBI	Completed 2017
Rikard Planting	GCSWCD, NYCDEP	Restored 0.26 acre of streamside vegetation along a portion of the Schoharie Creek in Lexington. Planted 120 riparian trees and shrubs along 115 feet of streambank	CSBI	Completed 2017
Bilash Arbor Day Planting	GCSWCD, NYCDEP, Trout Unlimited	Restored approximately 1.32 acre of streamside vegetation along 570 feet of the Schoharie Creek in Jewett. Plant 600 bare root riparian trees and shrubs for an Arbor Day volunteer planting event.	CSBI	Completed 2017
Japanese Knotweed Treatment	GCSWCD, NYCDEP	Treated Japanese knotweed with herbicides on the Kastanis Stream Restoration Project in 2017.	CSBI	Completed 2017
McWilliams Planting	GCSWCD, NYCDEP	Restored 0.25 acre of streamside vegetation along a portion of the Batavia Kill in Prattsville. Planted 170 riparian trees and shrubs along 210 feet of streambank.	CSBI	Completed 2018
Russ Planting	GCSWCD, NYCDEP	Restored 0.53 acre of streamside vegetation along a portion of the West Kill in West Kill, NY. Provided native seed and soil for riprap inter-planting and planted 40 riparian trees and shrubs along 575 feet of streambank.	CSBI	Completed 2018
Potter Planting	GCSWCD, NYCDEP	Restored 0.23 acre of streamside vegetation along a portion of the West Kill in West Kill, NY. Provided native seed and soil for riprap inter-planting and planted 116 riparian trees and shrubs along 245 feet of streambank.	CSBI	Completed 2018
Benjamin Property Planting	GCSWCD, NYCDEP	Riparian planting project restored approximately 300 linear feet of streamside vegetation along the East Kill. The Greene County Highway Department restored the stream channel. GCSWCD installed willow stakes along 300 feet of streambank.	CSBI	Completed 2018
Grossman Property Planting	GCSWCD, NYCDEP	Riparian planting restored approximately 300 linear feet of streamside vegetation along a Schoharie Creek tributary in Hunter. Streambank was graded in 2016. 221 native trees and shrubs and 6 vertical bundles were installed in fall 2017.	CSBI	Completed 2018
Japanese Knotweed Treatment	GCSWCD, NYCDEP	Treated Japanese knotweed with herbicides on the Brandywine/Ashland Connector Reach, Kastanis, Holden, Conine, and Ashland Town Park in 2018.	CSBI	Completed 2018

Ashland Town Park	Ashland, GCSWCD, NYCDEP	The project supported efforts to provide public access to the Batavia Kill and included signage, seeding, and riparian plantings. Signage was installed in 2016. Riparian plantings were installed in spring 2017.	SMIP	Completed 2017
	NYCDEP, GCSWCD, Town of Lexington, SWAC,	The Town of Lexington expanded the Schoharie Creek Park (Lexington Pocket Park) by purchasing two additional parcels, along County Route 13a, through the FEMA Property Acquisition Program. The project aimed to enhance public outdoor recreation and education along the Schoharie Creek. Components of the project included a low impact path, a shade structure, and signage/informational kiosk. The Schoharie Watershed Advisory Committee approved funding the riverfront access park contingent upon FEMA, and other
