Re: Schoharie Watershed Stream Management Program 2018-2020 Action Plan

The Greene County Soil and Water Conservation District (GCSWCD) and the NYC Department of Environmental Protection (DEP) have collaborated with the Schoharie Watershed Advisory Committee (SWAC) to develop the 2018 – 2020 Action Plan. The Action Plan provides the Schoharie Watershed Stream Management Program's activities, projects and programs that are planned for 2018-2020 as well as program accomplishments.

The Action Plan is divided into key programmatic areas:

- A. Protecting and Enhancing Stream Stability and Water Quality
- B. Floodplain Management and Planning
- C. Highway and Infrastructure Management in Conjunction with Streams
- D. Assisting Streamside Landowners (Public and Private)
- E. Protecting and Enhancing Aquatic and Riparian Habitat
- F. Enhancing Public Access to Streams

The Action Plan is updated and revised annually. This plan will be implemented from May 2018 – May 2020.

Schoharie Watershed Stream Management Program 2018-2020 Action Plan

Purpose

This Action Plan identifies stream management goals, presents a subset of stream management plan recommendations and identifies current implementation initiatives by the Schoharie Watershed Stream Management Program for the period 2018-2020. The Action Plan also provides the current status or progress of each action item.

How to read this document: The Action Plan is organized around key programmatic areas. For each topic area, a list of recommendations, derived from Stream Management Plans and program staff, are provided in *italicized* text. Following the recommendations, the ongoing projects, programs and activities, including those that are funded through the Stream Management Implementation Program (SMIP), are listed.

Background

The Schoharie Watershed Stream Management Program (SWSMP) was established in a partnership between the Greene County Soil & Water Conservation District (GCSWCD) and NYC Department of Environmental Protection (DEP) in 1997 as part of the Filtration Avoidance Determination (FAD) issued to DEP by the Environmental Protection Agency. Stream Management Plans have been completed for each major river corridor in the Schoharie Watershed and each plan includes a set of general recommendations, and project specific recommendations, which provide a "road map" for improved stream and floodplain management. In addition to supporting the FAD, many SWSMP projects also targeted reductions to in-stream sources of suspended sediments as part of DEP's Shandaken Tunnel State Pollution Discharge Elimination System (SPEDES) permit established in September 2006. The SWSMP seeks to advance state-of-the-art watershed management projects, policies and programs to improve and protect the Schoharie's water resources. Initiatives include the Stream Management Implementation Program (SMIP), the Catskill Streams Buffer Initiative (CSBI), stream and floodplain restoration projects, stream and watershed assessments, flood hazard analysis and mitigation, and education and outreach programs.

The following Action Plan summarizes the programs and projects that GCSWCD will be leading within the Schoharie Basin between May 2018 and May 2020, and includes action plan updates through May 1, 2018. The GCSWCD will lead the efforts for each action item, and work cooperatively with watershed partners including, but not limited to, the Schoharie Watershed Advisory Committee (SWAC), NYCDEP, NYSDEC, CWC and watershed municipalities. Funding sources for our action items include, Stream Management Implementation Program (SMIP), Catskill Streams Buffer Initiative (CSBI), Watershed Assistance Program (WAP), Water Resources Development Act (WRDA), Catskill Watershed Corporation (CWC), DEP/GCSWCD Schoharie Watershed Stream Management Program (Contract), Federal Emergency Management Agency (FEMA), and Natural Resource Conservation Service Emergency Watershed Protection Program (EWP).

Program Administration

The Schoharie Watershed Stream Management Program requires on-going administrative and organizational support to implement stream management efforts. Many of the program administration action plan items began in 2007 and will continue through the duration of the stream management program. Additional action items may be added as the program evolves and as program goals are refined.

Action Item	Partners	Description	Funding	Status
Program Administration and Implementation Inter-Agency Coordination	NYCDEP, GCSWCD, MSMA, SWAC GCSWCD, NYCDEP, NYSDEC, USACOE	The GCSWCD has developed an effective and efficient process for implementation of the stream management plans for Schoharie Creek and its associated tributaries. These efforts help to fulfill the NYCDEP FAD obligations. Development and implementation of the program is an ongoing process. Facilitate coordination between the agencies with stream management responsibilities. This is a key component of SMP implementation.	NYCDEP/ GCSWCD SMP Contract NYCDEP/ GCSWCD SMP Contract	On-going On-going
Schoharie Watershed Advisory Committee (SWAC)	Schoharie Basin Municipalities, Technical Advisors, GCSWCD, NYCDEP	The organizational structure of the Schoharie Watershed Advisory Committee (SWAC) was developed in early 2008. After the kick off meeting in May 2008, the SWAC has met regularly throughout the years, developed program materials to initiate a stream management plan implementation process, and identified projects for implementation. Administrative support for the SWAC remains an on-going activity, with SWAC member reappointments, town readoption of SMPs, signing of MOUs to collaborate on stream issues, regular municipal updates and SWAC meetings.	NYCDEP/ GCSWCD SMP Contract	Organized May 2008, meet 2-3x per year
Catskill Streams Website	NYCDEP, GCSWCD Schoharie SMP Contract	The GCSWCD will continue to provide logistical support in the development and maintenance of the Catskill Streams Website as a valuable tool for sharing information with watershed stakeholders. The GCSWCD will also continue to maintain and update the District's website.	NYCDEP/ GCSWCD SMP Contract	On-going
Plant Materials Program	NYCDEP, GCSWCD	GCSWCD will continue to maintain its Plant Material Center, stocked with species native to the Catskills, in a way necessary to hold over/grow out native plant material to be used at stream restoration sites. Tasks include the ordering of plant material, willow harvesting, maintaining an inventory of the plants in the PMC, clearing plants of harmful weeds, watering as frequently as necessary and repotting materials if they outgrow their containers.	NYCDEP/ GCSWCD Contract	On-going
Operation and Maintenance	NYCDEP, GCSWCD, Landowners	The GCSWCD, NYCDEP and project partners will work to maintain project sites throughout the Schoharie Creek watershed. This may include, but is not limited to, supplemental planting, bioengineering, minor repairs, general maintenance and assessments as needed.	NYCDEP/ GCSWCD SMP Contract	On-going, maintenance plan developed annually in Spring

A. Protecting and Enhancing Stream Stability and Water Quality

Protecting and enhancing stream stability and water quality may include: stream corridor assessments; stream stabilization/restoration projects with a goal to restore stream stability and reduce targeted pollutant; monitoring and maintenance of stream projects; and outreach, education and technical assistance to encourage stream stewardship.

STREAM CORRIDOR ASSESSMENT AND MONITORING RECOMMENDATIONS

- 1. Complete a watershed assessment of tributaries within the Schoharie Creek Watershed that have yet to be assessed and conduct updated assessments of sub-basin streams to record current conditions. These tributaries should be studied to identify and prioritize sediment sources, erosion hazards, and potential water quality impairments and associated treatment opportunities.
- 2. Review existing water quality data and identify, to the extent possible, the most significant water quality impairments.
- 3. Identify locations of potential water quality impairments including; sources of pollution from upland areas and within the stream channel such as significant glacial lake clay exposures, and sources of contaminants from road runoff and households, and make prioritized recommendations for their mitigation.
- 4. Identify, monument and survey selected sites of bank erosion, assess their relative stability, and make prioritized recommendations for their treatment.
- 5. Monitor constructed stream restoration sites to document the projects' status and performance. Monitoring will include measurements and analysis of geomorphic form, rock structures, and vegetation. Monitoring will be performed in accordance with Army Corps of Engineers permit requirements as well as GCSWCD/NYCDEP annual assessments of the need for additional monitoring. Data will be collected to monitor project stability and vegetation establishment.

STREAM ASSESSMENTS AND MONITORING							
Action Item	Partners	Description	Funding	Status			
		Stream Feature Inventories (SFI) are an on-going priority to assess					
		baseline conditions and identify potential projects. The					
		Huntersfield Creek, Red Kill and Little West Kill SFIs post-					
		processing and geodatabase management were completed in 2017.	NYCDEP/				
		The Batavia Kill SFI was also conducted in 2017. The West Kill	GCSWCD				
Stream Inventory	NYCDEP,	SFI will be conducted in 2018. Stream corridors to assess in 2019	SMP				
and Assessment	GCSWCD	will be determined in winter, 2018.	Contract	Active			
				Years 1, 2, 3			
		Annual monitoring of restored stream reaches provides valuable		and 5 post-			
		information on the effectiveness of restoration practices in		construction;			
		addition to fulfilling the permit requirements associated with these	NYCDEP/	schedule			
Monitoring of		projects. Monitoring includes a visual inspection of the reach,	GCSWCD	developed			
Restored Stream	NYCDEP,	photo documentation, pebble counts, and a survey of monumented	SMP	annually in			
Reaches	GCSWCD	cross sections and the longitudinal profile.	Contract	January			

Vegetation Monitoring	NYCDEP, GCSWCD	Annually, the GCSWCD and project partners monitor the native riparian vegetation that has been installed along streambanks within the Schoharie watershed. Riparian plantings are completed in conjunction with the installation of natural channel designed (NCD) stream restoration projects and CSBI projects. Vegetation provides for increased stability as trees and shrubs continue to mature, and it is a critical component to the long-term success of these types of projects. Annual vegetation monitoring provides valuable information on the effectiveness of restoration practices in addition to fulfilling the permit requirements associated with these projects.	NYCDEP/ GCSWCD SMP Contract	Annually, Schedule updated in January
		GCSWCD and DEP will get together to discuss available data,		
SMP Water Quality	NYCDEP	priority pollutants and the strategy for restoration project	37.1	
Workshop	GCSWCD	identification.	NA	June, 2018

STREAM RESTORATION AND STABILIZATION RECOMMENDATIONS

- 1. Identify locations where roads, bridges, or culverts and water quality may be threatened by SMP prioritized bank erosion, or are otherwise unstable or threatened, and make prioritized recommendations for their treatment.
- 2. Identify locations where improved or residential areas and water quality may be threatened by bank erosion, and make prioritized recommendations for their treatment.
- 3. Identify locations of stream instabilities contributing to water quality impairment and make prioritized recommendations for their mitigation or treatment.
- 4. Implement stream stability restoration projects that have been identified through field assessments or prioritized in management plans.
- 5. Governmental landowners in the Schoharie Creek watershed should manage their lands using natural channel stability concepts, and should serve as a model for other watershed landowners.

STREAM RESTORATION AND STABILIZATION							
Action Item	Partners	Description	Funding	Status			
Batavia Kill Restoration at Red	GCSWCD,	A full-channel restoration project located on the Batavia Kill at the border of Ashland and Prattsville is in the assessment and design phase. This project will develop a plan to stabilize eroding streambanks and to protect water quality by reducing fine sediment sources along this high-turbidity producing reach of stream. The design will address over a mile of severely degraded stream. The project will be implemented in phases. The assessment, design, permitting and implementation for Phase 1 are in progress, and construction is planned for 2019-	SMIP, GCSWCD/ NYCDEP SMP				
Falls	NYCDEP	2020.	Contract	Active			
Rion Stream Restoration Assessment and	SCSWCD, GCSWCD,	Assessment and design of the Rion stream and floodplain restoration project in Conesville. The stream project will follow the buyout of a flood hazard property. Assessment and	SMIP GCSWCD/NYCDEP	A			
Design	NYCDEP	design began in 2017 and will be completed in 2018.	SMP Contract	Active			

		This project is located upstream of an existing culvert crossing		
		on an unnamed tributary to the East Kill. The culvert has		
		capacity issues that result in bed instability upstream and		
CR78 Culvert on		downstream of the structure. This project is intended to install		
Tributary to East	GCSWCD,	bed stability structures in the reach upstream of the culvert		
Kill Bed	NYCDEP,	replacement to achieve long term bed stability and habitat		
Stabilization	GCHD	protection.	SMIP	Active

STREAM STEWARDSHIP EDUCATION AND OUTREACH RECOMMENDATIONS

- 1. Collaborate with local and regional partners to enhance education and outreach efforts related to stream and floodplain management, sediment and erosion control, and other topics critical to sound watershed management.
- 2. Maintain a watershed website to provide information to watershed stakeholders.
- 3. Develop publications focused on stream management which can be provided to watershed stakeholders and/or used in training workshops.
- 4. Host a Schoharie Watershed Month with various events planned for watershed residents and visitors to promote awareness and stewardship.
- 5. Increase public and technical awareness about the importance of the Schoharie Creek watershed and ecosystem by providing educational workshops for a variety of stakeholders including, riparian landowners, municipal leaders, planning boards, code enforcement personnel, highway departments, local businesses, contractors, developers and educators.
- 6. Increase technical awareness of stream science, water quality protection and best management practices by providing educational workshops for a variety of stakeholders including, riparian landowners, municipal leaders, planning boards, code enforcement personnel, highway departments, local businesses, contractors, developers and educators.
- 7. Develop detailed, science based guidelines to stream management which are readily available to those entities responsible for stream activities in the Schoharie Creek watershed. Guidelines must emphasize natural channel stability.

STREAM STEWARDSHIP EDUCATION AND OUTREACH					
Action Item	Partners	Description	Funding	Status	
		The GCSWCD continues to work with NYCDEP and others to develop and implement a comprehensive			
		education and outreach strategy with goals submitted annually in January. The GCSWCD will help identify	GCSWCD/ NYCDEP		
	NYCDEP,	training needs and plan training activities for a wide range	SMP		
Annual Education and	GCSWCD,	of audiences; training activities may be basin-wide or	Contract,		
Outreach Plan	SWAC	specific to individual sub-basins.	WAP, CWC	Annually	

Spring in Spruceton Photography Walk with Photographer	NYCDEP/ GCSWCD/ SWM Planning	GCSWCD is teaming up with local photographer Francis X. Driscoll for a guided photography hike in the		
France X. Driscoll	Committee	Spruceton Valley area.	SMIP	Active
Eco-Friendly Story Time & Craft Hour at the Mountain Top	NYCDEP/ GCSWCD/ SWM Planning Committee	GCSWCD and the Mountain Top Library teamed up to select children's books to be read at the Mountain Top Library's regularly scheduled story time on Saturday mornings throughout Schoharie Watershed Month (May 2018). The stories will be partnered with related crafts for young children.	SMIP	Active
Invasive Species Day at the Mountain Top Arboretum	NYCDEP/ GCSWCD/ SWM Planning Committee/ Mountain Top Arboretum	The Mountain Top Arboretum is hosting an Invasive Species Day. Dan Snider, of the Catskill Regional Invasive Species Partnership (CRISP), will lecture and lead a walk to ID invasive plant species. Attendees will put new knowledge to practice with a group weed pull focusing on specific removal methods of the invasive lesser celandine ground cover.	SMIP	Active
Trails Event	NYCDEP/ GCSWCD/ SWM Planning Committee	There will be an outdoor educational walk on the Hunter Branch railroad bed presented by Joan Kutcher, Pete Senterman and Michelle Yost. Participants will have the opportunity to learn about plant identification, early railroad history and outdoor recreation opportunities in the watershed.	SMIP	Active
Bog Tour with Mike Kudish at the Mountain Top Arboretum	NYCDEP/ GCSWCD/ SWM Planning Committee/ Mountain Top Arboretum	Mike Kudish, forest historian, will lead a short walk into the Mountain Top Arboretum's Spruce Glen where participants will learn about bog ecology and history. If conditions permit, Mike will take a peat core sample to help determine the bog's age and evolution.	SMIP	Active
Birds Along the Batavia Kill	NYCDEP/ GCSWCD/ SWM Planning Committee	Larry Federman, of Audubon, NY, will lead a bird and nature discovery walk near the Batavia Kill at the Windham Path.	SMIP	Active
Mountain Top Arboretum Native Shrub Replanting	NYCDEP/ GCSWCD/ SWM Planning Committee/ Mountain Top Arboretum	A native species planting project at the Mountain Top Arboretum. Dan Snider will speak on invasive shrubs, and provide participants with the opportunity to learn about native shrub alternatives. GCSWCD will assist with the removal of non-native honeysuckle and vetch and prepare the planting site prior to the volunteer event. Participants will help replant the area with beautiful native shrubs	SMIP	Active
Stormwater Floodplain Simulation System	NYCDEP/ GCSWCD/ E & O Subcommittee	The Ward's Stormwater Floodplain Simulation System provides a hands-on demonstration of stormwater and the critical role of floodplains. The model can do simulations of different types of surfaces (wetland, parking lot, and retention pond) and it shows how retention ponds and wetlands are important for flood management. This project involves the purchase of the model and development of curriculum for use with the model.	SMIP	Active

B. Floodplain Management and Planning

Floodplain management and planning may include: floodplain assessments; coordination of floodplain management efforts in the watershed; and outreach, education and technical assistance for floodplain management in the Schoharie Watershed.

LOCAL FLOOD ANALYSIS AND FLOODPLAIN ASSESSMENT RECOMMENDATIONS

- 1. Identify locations where roads, bridges, or culverts may be threatened by flooding, and make prioritized recommendations for their treatment.
- 2. Identify locations where improved or residential areas may be threatened by flooding, and make prioritized recommendations for their treatment.
- 3. Support flood hazard mitigation efforts to reduce the impacts from flooding such as impacts to public safety, homes and businesses, infrastructure and the natural environment.
- 4. Through LFA provide resources to help WOH municipalities: confirm that there is a significant flood hazard in the target area through engineering analysis; use engineering analysis to develop a range of hazard mitigation alternatives; the primary focus of the analysis is to identify the potential for reducing flood elevations through channel and floodplain restoration, as the first alternative to other hazard mitigation solutions; evaluate both the technical effectiveness and the benefit/cost effectiveness of each solution, and compare different solutions to each other for the most practical, sustainable outcome.

LOCAL FLOOD ANALYSIS AND FLOODPLAIN ASSESSMENT						
Action Item	Partners	Description	Funding	Status		
		In 2016, the Town of Ashland formed a Flood Advisory				
		Committee (FAC) that began to work with consultants through				
		2017 on a Local Flood Analysis (LFA). The LFA will help to	SMIP,			
	GCSWCD,	determine the causes of flooding, investigate and analyze the	NYCDEP/			
	NYCDEP,	overall potential of specific projects, and projects in	GCSWCD			
Ashland Local Flood	Town of	combination, in an attempt to mitigate flood damages and	SMP			
Analysis	Ashland	hazards.	Contract	Active		
			CWC,			
	GCSWCD,		NYCDEP/			
	NYCDEP,	The GCSWCD will continue to support the LFA recommended	GCSWCD

Implementation	Windham	floodplain in Windham.	Contract	Active		
		The Villages of Tannersville and Hunter and the Town of				
		Hunter are coordinating on a Local Flood Analysis that will				
	GCSWCD,	study the mapped FEMA streams within the three				
	NYCDEP,	municipalities namely the Schoharie Creek, Gooseberry Creek,	SMIP,			
	Town of	Sawmill Creek, and Red Kill. The LFA is undertaken to	CWC,			
	Hunter,	determine the causes of flooding, investigate and analyze the	NYCDEP/			
	Villages of	potential of specific projects, and projects in combination, in an	GCSWCD			
Schoharie Corridor	Hunter &	attempt to mitigate flood damages and hazards. Tannersville	SMP			
Local Flood Analysis	Tannersville	LFA is complete, Hunter LFA is underway.	Contract	Active		

FLOODPLAIN MANAGEMENT COORDINATION, EDUCATION AND OUTREACH RECOMMENDATIONS

- 1. The GCSWCD should support local municipalities in the use of FIRM maps.
- 2. Municipalities in the watershed should conduct a review of current floodplain ordinances and adopt revisions as appropriate. Revisions should reflect current building trends, new technologies, compliance and integrated broader community plans as appropriate.
- 3. Schoharie Watershed municipalities should evaluate participation in the FEMA Community Rating System.
- 4. Access to flood prevention/protection information should be established and supported throughout the Schoharie Creek Watershed.
- 5. Watershed municipalities, working with local and state agencies, should support periodic training sessions on flood related issues. Audiences should include municipal leaders, code enforcement staff, planning boards, landowners, realtors, lending institutions and others.
- 6. Watershed municipalities should facilitate development of a flood damage reporting system to track types of flooding, their location and the costs associated with flood damage.
- 7. Stream and floodplain management guidelines, which integrate stream form and function, should be developed for use during post flood response.
- 8. Identify locations where roads, bridges, or culverts may be threatened by bank erosion or flooding, or are otherwise unstable or threatened, and make prioritized recommendations for their treatment.
- 9. Identify locations where improved or residential areas may be threatened by bank erosion or flooding, and make prioritized recommendations for their treatment.

FLOODPLAIN MANAGEMENT COORDINATION, EDUCATION AND OUTREACH					
Action Item	Partners	Description	Funding	Status	
		The NYCDEP flood buyout program was initiated in			
	NYCDEP,	2017. GCSWCD facilitates the program and may serve as			
	GCSWCD,	the technical and outreach lead for some Schoharie	NYCDEP/		
	Schoharie	Watershed municipalities. The program began with	GCSWCD		
NYCDEP Flood	Watershed	erosion hazard buyout properties. Implementation of the	SMP		
Buyout Program	Municipalities	program is on-going.	Contract	On-going	
	_	The Manor Kill Floodplain Enhancement is a			
		recommended project identified during the Conesville			
		LFA. The property is part of a CWC buyout and the			
		existing structure is scheduled for demolition and removal			
		in June 2018. The project will involve removal of fill			
		from the right stream bank, and construction of a			
		floodplain bench. The floodplain enhancement project			
		will reduce 100-year flood elevations at this location;			
		reduce stream power and velocity; provide vegetative			
	NYCDEP,	bank treatments to stabilize the streambank, and reduce			
Manor Kill Floodplain	GCSWCD,	erosion and sedimentation. Design will be completed in			
Enhancement	SCSWCD	2018. Project construction is planned for 2018.	SMIP	Active	

C. Highway and Infrastructure Management in Conjunction with Streams

Highway and infrastructure management in conjunction with streams may include: best management practices (BMPs) to improve infrastructure and stream intersections; stormwater management; and outreach, training and financial assistance to infrastructure managers to demonstrate BMPs.

HIGHWAY, INFRASTRUCTURE AND STORMWATER MANAGEMENT RECOMMENDATIONS

- 1. Local municipalities, Greene County Highway Department and NYSDOT should place a priority on vegetation management on critical areas such as roadside ditches and steep slopes.
- 2. Watershed municipalities should evaluate winter road abrasive procedures to address abrasive quality, application methods and spring sweeping.
- 3. The Town and County Highway Departments and NYSDOT should integrate geomorphology principles in all new projects and routine maintenance activities related to the Schoharie Watershed.
- 4. Work with local highway departments to minimize the negative effects of bank armor through the use of vegetation within and above the armor. Replant existing rip rap. This will both increase the effectiveness and strength of the rip rap and cool water temperatures through shading and reducing the thermal effects of heated rock.
- 5, Work with the SWAC Highway Committee to identify opportunities to address infrastructure that is leading to stream instability and water quality degradation.

HIGHWAY, INFRASTRUCTURE AND STORMWATER MANAGEMENT					
Action Item	Partners	Description	Funding	Status	
		All of the SMPs and the SWAC Highway and Infrastructure			
		subcommittee recommend that local municipalities, county			
		highway departments and NYSDOT should place priority on			
		vegetation management on critical areas such as roadside			
		ditches and steep slopes. GCSWCD continues to partner with			
	GCSWCD,	all highway departments to provide critical area seeding for	SMIP,		
	NYCDEP,	roadside ditches and slopes using the district's hydroseeder	NYCDEP/		
	County &	and power mulcher. In 2016, the program launched a slope	GCSWCD		
Critical Area Seeding	Municipal	stabilization fund through SMIP to address prioritized slopes	Schoharie		
and Slope	Highway	with reinforced vegetative treatments for highway	SMP	On-	
Stabilization Program	Departments	departments that attended a mandatory training.	Contract	going	
		Several stormwater management practices are proposed to			
	NYCDEP,	treat the water from the roof drainage and provide storm water			
	GCSWCD,	infiltration. These include rooftop rain harvesting (gutter			
Kaaterskill United	Kaaterskill	system), and above ground cistern to capture the runoff and

RECOMMENDATIONS FOR OUTREACH AND TECHNICAL SUPPORT TO HIGHWAY DEPARTMENTS, STORMWATER MANAGERS, AND CONTRACTORS

- 1. Provide municipal highway departments and local contractors with hands-on training in various stream management activities. Conduct field days, workshops and demonstration projects to meet this goal.
- 2. Educate and train municipal highway departments in stream process, and provide them with information about how maintenance of road systems and other public infrastructure may impact local waterways.
- 3. Provide education and outreach to municipal highway departments, stormwater managers and contractors to improve their ability to recognize changes in stream stability and impacts to water quality that may be associated with infrastructure management activities and to understand the impact of any management action they may take.

OUTREACH & TECHNICAL SUPPORT TO HIGHWAY DEPARTMENTS, STORMWATER MANAGERS & CONTRACTORS					
Action Item	Partners	Description	Funding	Status	
		This training targets contractors, engineers, local government			
		and watershed residents and provides knowledge about why			
		stormwater is a concern and information on the new GP-0-			
		15-002 permit. The training also informs participants about			
		the requirements of stormwater pollution prevention plans			
NYS DEC endorsed		(SWPPP). Participants learn about erosion and sediment

D. Assisting Streamside Landowners (Public and Private)

Assisting public and private streamside landowners may include: providing access to training and technical information to increase water resource knowledge, skills and capabilities of landowners; and providing technical assistance and programmatic support for stream issues and riparian restorations.

CATSKILL STREAMS BUFFER INITIATIVE

- 1. Preserve and protect existing riparian buffers and provide for improved stewardship.
- 2. Efforts should be made to protect/enhance the stream corridor through the establishment of effective forested buffers. Stream buffers will offer some measure of protection against encroaching land uses and act to protect public and private property.
- 3. Assist landowners with their efforts to protect and maintain healthy riparian buffers, address invasive species, and improve the condition of unstable or degraded riparian areas.
- 4. Provide assistance with managing and preventing the spread of Japanese knotweed and other invasive species.
- 5. Provide assistance for streamside landowners to maintain diverse and healthy riparian buffers of at least 35-100 feet using native shrubs, trees and other woody vegetation.

CATSKILL STREA	CATSKILL STREAMS BUFFER INITIATIVE						
Action Item	Partners	Description	Funding	Status			
		Replant a large section of Batavia Kill streambank adjacent to Tompkins	-				
		Quarry. Project was on hold due to a change in ownership from					
	GCSWCD,	Tompkins Quarry to the Town of Ashland. A planting plan has been					
Tompkins Riparian	NYCDEP,	developed and GCSWCD will obtain landowner agreement with the					
Project	Ashland	Town of Ashland to proceed with bank grading and planting in 2018.	CSBI	Active			
		Riparian planting project to restore approximately 300 linear feet of					
		streamside vegetation along the East Kill. GCSWCD has a 5 year					
		landowner agreement for this property. The Greene County Highway					
		Department restored the stream channel. GCSWCD installed willow					
		stakes along 300 feet of streambank. Additional trees and shrubs will be					
Benjamin Property	GCSWCD,	planted on the site as needed. Project site will be evaluated to determine					
Planting	NYCDEP	vegetation needs in 2018.	CSBI	Active			
		Riparian planting to restore approximately 300 linear feet of streamside					
		vegetation along a Schoharie Creek tributary in Hunter. Streambank					
		was graded in 2016. 221 native trees and shrubs and 6 vertical bundles					
Grossman Property	GCSWCD,	were installed in fall 2017. Project site will be evaluated to determine					
Planting	NYCDEP	vegetation needs in 2018.	CSBI	Active			
		Restore approximately 5,840 square feet of streamside vegetation along					
		a portion of the Stony Clove in Hunter. Plant 60 riparian trees and

Russ Planting	NYCDEP	streambank.	CSBI	Active

OUTREACH, EDUCATION AND TECHNICAL ASSISTANCE TO STREAMSIDE LANDOWNERS

- 1. Provide streamside landowners detailed technical information on the establishment and maintenance of riparian buffers.
- 2. Provide stakeholders technical assistance that will guide restoration of stream system stability and help to maintain ecological integrity. Technical assistance can range from a landowner consultation to activities that will help meet the priorities of protecting water quality and establishing riparian buffers.
- 3. Provide long-term access to technical assistance to landowners and municipalities for assessment of their stream-related problems, and development of effective management strategies and to supervise stream project implementation.
- 4. Educate streamside landowners by providing a basic understanding of fluvial process, factors impacting streambank stability and water quality, and management decisions for the promotion of a healthy stream.
- 5. Characterize current riparian vegetation management in the watershed and make prioritized recommendations for changes that can improve ecosystem integrity.
- 6. Educate municipal leaders by providing a basic understanding of fluvial process, with an emphasis on how local decision makers can support stream health through their leadership and provide information on the multiple benefits which can be realized by protecting stream and watershed health.

OUTREACH, EDUCATION AND TECHNICAL ASSISTANCE TO STREAMSIDE LANDOWNERS					
Action Item	Partners	Description	Funding	Status	
		The GCSWCD and NYCDEP have worked cooperatively			
		to develop program resources and policies to provide			
		technical assistance for municipalities, planning boards,			
		highway departments, developers, landowners and other			
		interested parties. Technical assistance may include, but is	NYCDEP/		
		not limited to, stormwater planning and retrofit, stream	GCSWCD		
	GCSWCD,	management activities, project permitting, and land use	Schoharie,		
Local Technical Assistance	NYCDEP	planning.	WAP	On-going	
		The GCSWCD provided a Streamside Landowner			
		Workshop at the Mountain Top Library in Tannersville,			
		January 27th, 2018. The workshop was available to			
		individuals who own streamside property in Hunter,			
		Tannersville, Windham, Ashland, Jewett, Lexington, and			
		Prattsville. Attendees learned how to establish and increase			
		the riparian buffer zone on their own property by planting	NYCDEP/		
Streamside Landowner	GCSWCD,	native trees and shrubs. Participants learned about the	GCSWCD		
Workshop	NYCDEP	Catskill Streams Buffer Initiative (CSBI) program.	CSBI	2018	

Stream Management		The Greene County Soil & Water Conservation District provided an information session for the Stream Management Implementation Program (SMIP) at the Schoharie Watershed Program office in Tannersville on February 13th, 2018. A brief presentation about the		
Implementation Program	GCSWCD,	program was provided followed by an informal Q&A for	NYCDEP/	
Information Session	NYCDEP	attendees.	GCSWCD	2018

E. Protecting and Enhancing Aquatic and Riparian Habitat and Ecosystems

Protecting and enhancing aquatic and riparian habitat and ecosystems may include: support for research and education programs that encourage protection of aquatic and riparian ecosystems; support for comprehensive and community planning efforts that incorporate watershed protection; and support for habitat improvement projects that will benefit water quality.

STREAM AND RIPARIAN ECOSYSTEM RECOMMENDATIONS

- 1. Conduct a study to monitor summer season stream temperatures along the Schoharie Creek and associated impacts on fisheries. Study will assess if cold water fish communities are thermally limited, and locate areas where habitat improvements might mitigate these impacts, and areas of thermal refuge that may need protection.
- 3. Review existing water quality data and identify, to the extent possible, the most significant water quality impairments.
- 4. Identify locations of potential water quality impairments including; sources of pollution from upland areas and within the stream channel, such as significant glacial lake clay exposures, and sources of contaminants from road runoff and households, and make prioritized recommendations for their mitigation.
- 5. Characterize the status of stream ecosystem health utilizing existing fish and insect population data, and outlining the general threats to ecosystem health and integrity.
- 6. Conduct a watershed aquatic habitat study including; mapping habitats and associated characteristics throughout Schoharie Creek, characterization of fish species presence or absence in those habitats, establish target fish community structure based on regional and historic fish community data, and make recommendations for improvement of habitat for target community.
- 7. A habitat assessment should be conducted in the Schoharie Creek and major tributaries, with particular attention paid to thermal refuge for cold water fish.

STREAM AND RIPARIAN ECOSYSTEM ASSESSMENT AND ENHANCEMENT

	NYSDEC,	DEC and Partners proposed to design and build a brook trout				
	GCSWCD,	fishing area along Hunter Brook in the West Kill. DEC previously	USFWS,			
	TU, SWAC,	conducted brook trout studies in the reach. In 2018, GCSWCD	DEC,			
Fisheries Project	USFWS	will conduct topographic survey of the reach.	SMIP	Active		

WATERSHED PROTECTION AND COMMUNITY PLANNING RECOMMENDATIONS

1. Establish and maintain a comprehensive program that supports localized efforts and mobilization of the public for stream stewardship and the coordination of agencies, interest groups, municipalities, and stakeholders in community planning and watershed protection.

- 2. Watershed municipalities should evaluate their existing land use regulations, and adopt provisions which will protect stream corridor resources including wetlands, floodplains and floodways and provide additional local review for proposed development in these special areas.
- 3. A watershed-wide evaluation of regulations, including ordinances and zoning laws, should be undertaken. The evaluation should seek to identify regulatory gaps and determine if the current laws and ordinances adequately protect the watershed and encourage municipalities to update their regulations as needed.
- 4. Establish and support a Project Advisory Committee consisting of representatives of all significant stakeholder groups to coordinate the implementation of stream management plans.
- 5. Watershed municipalities should evaluate local ordinances such as comprehensive plans, zoning regulations, site plan review laws, subdivision laws and floodplain ordinances to determine if adequate consideration is given to riparian buffer impacts.
- 6. Watershed communities should integrate the evaluation of stormwater impacts on stream systems as they develop and implement comprehensive stormwater management plans which will protect water quality and reduce impacts on stream morphology.
- 7. Identify locations of potential water quality impairments including; source of pollution from upland areas and within the stream channel such as significant glacial lake clay exposures, and sources of contaminants from road runoff and households, and make prioritized recommendations for their mitigation.

F. Enhancing Public Access to Streams

Enhancing public access to streams may include: support for projects that improve the quantity and quality of public stream access and enhance stream-based recreational opportunities; and support for projects that provide water resource educational materials at public access points. These recommendations incorporate community development efforts into stream management.

ENHANCING PUBLIC ACCESS TO STREAMS RECOMMENDATIONS

- 1. Public access for fishing should be enhanced along the Schoharie Creek stream corridor. Additional public access, as well as improvements to parking and access trails, is representative of the type of activities that may be possible.
- 2. Investigate opportunities to develop multi-use, low impact trail systems along the stream corridor.

ENHANCING PUBLIC ACCESS TO STREAMS						
Action Item	Partners	Description	Funding	Status		
Lexington Riverfront Access Park	NYCDEP, GCSWCD, Town of Lexington, SWAC, FEMA, NYDOS	The Town of Lexington plans to expand the Schoharie Creek Park (Lexington Pocket Park) by purchasing two additional parcels, along County Route 13a, through the FEMA Property Acquisition Program. The project aims to enhance public outdoor recreation and education along the Schoharie Creek. Components of the project may include a low impact path, a shade structure, and signage/informational kiosk. The Schoharie Watershed Advisory Committee approved funding the riverfront access park contingent upon FEMA, and other regulatory, approvals for development of park-like amenities on the buyout parcels. Pending	SMIP	Active

- Public Access	WAKF	the trail and signage.	SMIP	Active		

STREAM ACCESS EDUCATION AND OUTREACH RECOMMENDATIONS

- 1. Develop an interesting, hands-on display and accompanying presentation that could travel with staff or volunteers to public places. Include the definition of a watershed, how people affect the watershed in their daily lives, the importance of a healthy watershed and what they can do to help improve water quality.
- 2. At public stream access sites, provide educational materials, such as signage, that may lead to an increased stewardship ethic for the stream.

Appendix A: Summary of Completed Projects May 2007 – May 2018

PROGRAM AD	MINISTRATION			
Action Item	Partners	Description	Funding	Status
		The GCSWCD and NYCDEP worked with NYSDEC to evaluate		
		alternatives and to offer training to address the complexity of		
		achieving turbidity control during construction. Two staff		
		members have been trained as Certified Professional Erosion and		
		Sediment Control Specialists, one has been trained as a Certified		
		Professional in Stormwater Quality and the majority of staff were		
		trained as part of the NYSDEC 4-hour erosion and sediment		
	CCCWCD	control certification. GCSWCD is also qualified to teach the 4-hour E/S control certification. GCSWCD purchased dewatering		
Restoration	GCSWCD, NYCDEP,	equipment for stream projects and routinely prepares stormwater	NYCDEP/	Completed
Project Permits	NYSDEC	pollution prevention plans for all size projects.	GCSWCD	Completed 2007
r roject r erinits	NISDEC	To manage the many projects and priorities in the action plan, the	GCSWCD	2007
		GCSWCD needs staffing and resources to provide overall project		
		administration. In 2007, a staffing plan was developed along with		
Program		a new intergovernmental agreement between GCSWCD and		
Administration	GCSWCD,	NYCDEP that began in January 2009 and will fund watershed	NYCDEP/	Completed
Staffing Plan	NYCDEP	activities through January 2014.	GCSWCD	2007
Starring Fran	TTTEBER	The GCSWCD and NYCDEP collaborated to establish a project	GEBTTEE	2007
		office within the Schoharie Watershed. The GCSWCD and WAP		
		identified and secured a Mountaintop project office in		
		Tannersville. The office is used by various local, regional, and		
		state committees working on watershed protection (e.g. Schoharie		
	GCSWCD,	Watershed Advisory Committee, subcommittees of the SWAC,		
	GCWAP,	Mountaintop Supervisory & Mayors Association, WOH Education	NYCDEP/	Completed
Program Office	NYCDEP	& Outreach committee, etc.).	GCSWCD	2008
		To successfully implement a multi-year riparian buffer program it		
		was necessary to work with NYSDEC, USACOE, and NYCDEP		
	GCSWCD,	to develop a general permit to allow for rapid planning and		
	NYCDEP,	installation of riparian buffers. The general permit applies to		
Riparian Buffer	NYSDEC,	minor (less than 300 ft.), short-term impacts such as, bank	NYCDEP/	Completed
General Permit	USACOE	preparation and planting.	GCSWCD	2009
		Completed an RFP process to develop a list of "pre-qualified"		
General	CCCMCD	contractors for work including but not limited to, installing	NWCDED/	C
Contracting	GCSWCD, NYCDEP	stormwater management practices, drainage improvements, and	NYCDEP/	Completed
Specification	NYCDEP	stream projects. All Greene County municipalities within the Schoharie Basin and	GCSWCD	2009
		sub-basins (Batavia Kill, East Kill and West Kill watersheds) and		
	Schoharie	the Town of Conesville (Manor Kill) have adopted the relevant		
	Basin	SMPs and signed Memoranda of Understanding (MOU) with		
	Municipalities,	GCSWCD and SCSWCD, respectively. Annual reviews occur		
	Conesville,	with the municipalities per the MOU and provide an update on		Completed
	GCSWCD,	current action items within the municipality, while also seeking		2009,
Local Adoption	SCSWCD,	input from municipal officials in identifying potential future	NYCDEP/	renewed
of SMPs	NYCDEP	projects based on local needs.	GCSWCD	as needed
		The organizational structure of the Schoharie Watershed Advisory		
		Committee (SWAC) was developed in early 2008. After the kick		1
		off meeting in May 2008, the SWAC has met regularly throughout		1
	Schoharie	the year, developed program materials to initiate a stream		
	Basin	management plan implementation funding application process,		
Schoharie	Municipalities,	and identified initial projects for implementation. Although		
Watershed	Technical	administrative support for the SWAC remains an on-going		Organized

STREAM RESTORA	TION AND S	TABILIZATION		
Action Item	Partners	Description	Funding	Status
		Windham- Batavia Kill: a NYS DOT Article 15 stream		
		disturbance permit was flagged by DEC Region 4 for potential		
		inclusion of a natural channel design approach. The project,		
	NYCDEP,	designed and implemented by GCSWCD, established a	NYCDEP/	
Holden Stream	GCSWCD	geomorphically appropriate channel and floodplain bench and	GCSWCD,	Completed
Restoration	NYSDOT	included riparian plantings which restored floodplain function.	NYSDOT	2007
		Town of Prattsville- Batavia Kill: GCSWCD/NYCDEP		
		completed a full geomorphic based restoration of a +/- 1800 foot		
	NA CONTRACTOR	reach on the lower Batavia Kill. The project addressed severe	NI COED	
Conine Farm Stream	NYCDEP,	slope instability, reduced sediment loading and protected private	NYCDEP/	Completed
Restoration	GCSWCD	property.	GCSWCD	2008
		Town of Hunter- Esopus Basin: repairs were made on the		
		Lanesville Demonstration Stream Restoration Project. Most		
		adjustments were associated with gullying on a high slope failure		
I		caused by poor drainage on the terrace above the slope, which		
Lanesville Stream	NWCDED	had not been addressed as part of the restoration project. Other	NYCDEP/	C
Restoration Project	NYCDEP, GCSWCD	adjustments were made in rock vane elevations and additional	GCSWCD	Completed 2008
Repairs	GCSWCD	bioengineering was added to mitigate gullying.	GCSWCD	2008
		Repairs to a restoration project GCSWCD implemented in 2000.		
		The April 2005 flood damaged two dewatering wells which then failed to relieve artesian conditions and a mud boil returned,		
		causing chronic turbidity. GCSWCD modified the damaged rock		
Broadstreet Hollow				
Stream		structures and hired a well drilling subcontractor to attempt to rehabilitate the dewater wells. The subcontractor found the well		
(BSH) Restoration		heads had broken and couldn't be rehabilitated. After reviewing		
Project	NYCDEP,	all options, a decision was made to abandon the wells and	NYCDEP/	Completed
Repairs	GCSWCD	monitor the projects stability.	GCSWCD	2008
терин з	GEBTTED	Town of Jewett- East Kill: excessive erosion, following 2005	GEBTTED	2000
		and 2006 floods, caused damage to project grading and rock		
		structures, including 4 rock vanes and 2 cross vanes. The site		
		was originally vegetated by Conservation Reserve Enhancement		
		Program (CREP), but the seedlings never became established,		
		limiting project success. This restoration included: removal or		
		modification of damaged rock and cross vanes, treatment of the		
		back channel area to reduce frequency of flows in the back		
		channel and promote use of primary channel, bank grading,		
		vegetative stabilization to reduce erosion, and establishment of		
		riparian buffer along restored reach. Also, a bankfull bench was		
		added, 1,179 larger trees were planted, willow stakes and	NYCDEP/	1
Faber Farm Stream	NYCDEP,	approximately 1,000 feet of willow fascines were installed, along	GCSWCD,	Completed
Restoration	GCSWCD	with many shrubs, sedges, and herbaceous seed.	ACOE	2008
		Town of Ashland- Batavia Kill: GCSWCD completed planting		
		on the streambanks and floodplains at the lower end of the		
		project reach. Also, compensatory wetland areas were planted		
		with appropriate species. Limited site cleanup work on		
Ashland Connector	NYCDEP,	access/staging areas was completed, and the project was	NYCDEP/	Completed
Reach	GCSWCD	surveyed as part of routine project monitoring schedule.	GCSWCD	2008

Schoharie Street Stabilization	NYCDEP, GCSWCD	Village of Hunter: stabilization of approximately 120 feet of high stream bank to protect infrastructure and private property. Project includes stacked and pinned riprap and vegetated beds. The GCSWCD and NYCDEP also added additional riparian buffer plantings on the opposite bank. Additional plantings including balled and burlapped river birch trees, were added fall 2009.	NYCDEP/ GCSWCD	Completed 2009
West Kill Restoration Project, Long Road	NYCDEP, GCSWCD	Town of Lexington: completed a full geomorphic restoration of approximately 2,400 linear feet of stream on the West Kill in Spruceton Valley. The site had significant bank failure and clay exposures in bank and stream bed. Wetland delineation, archaeological investigation and final survey of site conducted.	NYCDEP/ GCSWCD	Completed 2009
Oakwood Pistol Club	NYCDEP, GCSWCD, CWC	Town of Prattsville: GCSWCD led the CWC Stream Program streambank projection project. Engineering services were contracted for this project; design plans and specifications have been submitted for permit, and construction completed.	CWC Stream Corridor Protection Grant	Completed 2009
Windham Golf Course Streambank Project	NYCDEP, GCSWCD, CWC	Primarily a CWC project with GCSWCD assistance. The project provided for the removal of failed sheet piling, armoring of the toe and sloping of the bank, and planting of approximately 155 feet of streambank. Town of Windham- Batavia Kill Tributary: removed mortared	CWC, NYCDEP/ GCSWCD	Completed 2009
Sugar Maples Stream Restoration	NYCDEP, GCSWCD	stone walls that confined a tributary and restored the stream to a natural shape and meander pattern. Floodplain grading was performed and the site was seeded with wetland and riparian seed mixes. GCSWCD hosted a student planting with three schools to install 1,584 herbaceous plugs, 340 willow stakes, 250 trees and shrubs, and 7 willow fascines. The project was designed to restore wetland functions and approximately 700 feet of stream that was historically channelized and confined by mortared stone walls.	NYCDEP/ GCSWCD, ACOE	Completed 2010
Wright Stream Bank Stabilization/ Riparian Project	NYCDEP, GCSWCD, SCA	A bankfull bench of approximately 1,200 feet was constructed and 3,127 feet of the streambank were re-vegetated. A rock installation was completed by the project contractor, while plantings were installed by GCSWCD staff and SCA service project hosted by GCSWCD.	NYCDEP/ GCSWCD, CWC, ACOE	Completed 2010
Wright Stream Bank Stabilization/ Riparian Project Enhancement	NYCDEP, GCSWCD	The previously constructed project was modified and enhanced with additional vegetative treatments in 2011 and monitoring initiated in 2012.	NYCDEP/ GCSWCD	Completed 2011
Vista Ridge Floodplain Restoration	NYCDEP, GCSWCD	This project improved the immediate project area and the aggraded reach upstream, by reducing a backwater condition at the Vista Ridge bridge. The project also enhanced the riparian buffer, reduced the risk of failure of Vista Ridge and Colgate Lake Roads, reduced erosion of silts and clays, and provides for improvement of the habitat value of the reach.	NYCDEP/ GCSWCD, ACOE	Completed 2011
Holden Stream Restoration Project	NYCDEP, GCSWCD	Phase 1 of the project was completed in 2011; continued construction was postponed due to Hurricane Irene. Project construction completed in 2012. The project included streambank and channel excavation to achieve stable geometry, installation of in-stream stabilization structures and a variety of bioengineering techniques along 3,500 feet of stream channel. Over 6,000 trees were planted along the restored stream channel.	NYCDEP/ GCSWCD	Completed 2011-2013
Windham Country Club Repairs	NYCDEP, GCSWCD	Windham- Batavia Kill: There were significant damages sustained at the Windham Country Club. Topographic data was collected to support cost, material and labor estimates for implementation of the repair work. GCSWCD provided technical support to the project due to the extensive damage that occurred along the stream corridor.	NYCDEP/ GCSWCD	Completed 2012

East Kill Restoration at Apple Hill	NYCDEP, GCSWCD	Project components included the realignment and resizing of 3,500 feet of channel, the installation of 23 rock structures, and installation of extensive bioengineering treatments and riparian plantings over the 11 acre site. These efforts will improve water quality, reduce risk to humans and property, reduce erosion and excessive sediment loading, restore floodplain function, and improve aquatic and terrestrial habitat.	NYCDEP/ GCSWCD, SMIP, ACOE, EWP	Completed 2012
NYS Route 42 West Kill Slope Failure	GCSWCD NYCDEP NRCS	Town of Lexington: The project addressed a large slope failure along a 1,400 foot reach of the West Kill, just downstream of the Pushman Bridge on NYS 42. The project included stream bank and channel excavation, and the installation of in-stream stabilization structures to achieve stable geometry. Practices include rock riffles, random boulder clusters, log boulder revetment and dry rock riprap with willow stakes to establish an armored flood plain bench at the toe of the slope, upper portions of the slope were hydroseeded and staked, and an as-built survey and plans have been prepared.	NYCDEP/ GCSWCD, EWP	Completed 2013
Conine Project Repairs	NYCDEP, GCSWCD	Town of Prattsville: The purpose of this work was to repair a project that was damaged during Irene in 2011. The repair project measured approximately 2,200 linear feet in length, with a disturbance area of 11 acres. Extensive earthwork required to restore original grades, and included excavation and placement of over 52K cubic yards of material. The project included the repair and reconstruction of 5 j-hook vane structures, two cross vanes, and a constructed riffle. Biotechnical measures taken included live staking and fascines, seeding native riparian and wetland seed mixes, and developing a 7.1 acre riparian zone.	FEMA NYCDEP/ GCSWCD	Completed 2013
Maier Farm Project Repairs	NYCDEP, GCSWCD	Town of Ashland- Batavia Kill: The purpose of the project was to repair a portion of a project constructed in 1999 that sustained damage during Irene in 2011. Damages included streambank erosion, structural damage to rock structures, channel migration and land loss, and excess sedimentation. Earthwork was completed to restore original grades. The reconstruction of two j-hooks and repair of one cross vane provided channel grade control, stream bank stabilization, and habitat enhancement. Bioengineering, including live staking and fascines, along with the establishment of a one acre riparian zone was completed.	FEMA NYCDEP/ GCSWCD	Completed 2013
Brandywine Project Repairs	NYCDEP, GCSWCD	Town of Ashland- Batavia Kill: The project addressed damages sustained to the Brandywine restoration site during Irene in 2011.	FEMA NYCDEP/ GCSWCD	Completed 2014
Ashland Connector Reach Project Repairs	NYCDEP, GCSWCD	Town of Ashland- Batavia Kill: The project addressed damages sustained to the Ashland Connector Reach during Irene in 2011.	FEMA NYCDEP/ GCSWCD	Completed 2014
Long Road Project Repairs	NYCDEP, GCSWCD	Town of Lexington- West Kill: The project addressed damages sustained to the Long Road restoration site during Irene in 2011.	FEMA NYCDEP/ GCSWCD	Completed 2014
Lanesville Project Repairs	NYCDEP, GCSWCD	Village of Hunter- Stony Clove: The project addressed damages sustained to the Lanesville restoration site during Irene in 2011.	FEMA NYCDEP/ GCSWCD	Completed 2014
Ashland Well Heads Protection Project	NYCDEP, GCSWCD	Town of Ashland- Batavia Kill: The project addressed damages sustained to the Ashland Wells Head restoration site during Irene in 2011.	NYCDEP/ GCSWCD, EWP, ESD	Completed 2014
Shoemaker Project Repairs	NYCDEP, GCSWCD	Damages sustained on the Shoemaker Stream Restoration project on the West Kill were repaired in 2014 and 2015.	FEMA, NYCDEP/ GCSWCD	Completed 2015
Manor Kill Stream Restoration	SCSWCD, GCSWCD, NYCDEP,	A full-channel restoration project was installed adjacent to the Conesville Town Park in order to stabilize eroding streambanks and protect water quality by reducing fine sediment sources	SMIP, NYCDEP/ GCSWCD,	Completed 2015

	Conesville	along this reach of stream.		
Schoharie Creek Stabilization and Riparian Restoration at Kozak	GCSWCD, NYCDEP	Located along the Schoharie Creek, this project involved restoring 750 linear feet of erosion with clay exposures by grading the bank and stabilizing the toe with rock and bioengineering treatments. A 50-100 feet wide riparian buffer was established by planting native tree and shrub species along 1,500 feet of streambank.	SMIP, GCSWCD, NYCDEP	Completed 2016
Batavia Kill Restoration at Big	GCSWCD,	Repair of damages sustained on the Big Hollow Stream	FEMA, NYCDEP/ GCSWCD	
Hollow Project Repairs	NYCDEP, FEMA	Restoration project on the Batavia Kill were completed in 2016. Design, permitting and bidding were complete in 2013.	Schoharie Contract	Completed 2016

	Workshop	GCSWCD	erosion and sediment control problems.	GCSWCD	2017

r			,	
		GCSWCD teamed up with Trout Unlimited and		
	NYCDEP/	NYSDEC for a volunteer tree planting in a riparian		
	CSBI/	buffer zone along the Schoharie Creek in Jewett. This		
Schoharie Creek Arbor	GCSWCD/	planting event was held on Saturday, April 29th, 2017 in		
Day Volunteer Tree	NYTU/	honor of Arbor Day. This event was part of Schoharie		Completed
Planting	NYSDEC	Watershed Month.	SMIP	2017
		Students from schools around the mountaintop displayed		
		their films, sculptures, photographs, and other artwork		
		for the "Now Streaming: Life in the Schoharie" art show.		
		Exhibit ran through the month of May. This exhibit was		
Opening Student/	NYCDEP/	on display at the Mountain Top Library during Schoharie		Completed
Amateur Art Exhibit	GCSWCD	Watershed Month.	SMIP	2017
		GCSWCD staff teamed up with the Platte Clove		
		Community and a few volunteers from the general public		
		to hold a volunteer potting-up event at the Plant		
		Materials Center in Hensonville. The trees and shrubs		
		that were potted up will be used in future streamside		
I		plantings with GCSWCD. The two volunteer potting-up		
Volunteer Potting-Up	NYCDEP/	events took place on Tuesday, May 9th, and Wednesday,		Completed
Events	GCSWCD	May 17th, during Schoharie Watershed Month.	SMIP	2017
		Diane Galusha's illustrated talk "Schoharie Passage:		
		From Mountain to Manhattan." The Liquid Assets author		
		traced the Schoharie Creek's journey from the Catskills		
		High Peaks to the faucets of New York City. This talk		
		described the history of the NYC drinking water supply,		
		with a focus on the construction of the Schoharie		
		Reservoir. Attendees had an opportunity for a book		
"Schoharie Passage:		signing with Diane Galusha following the presentation.		
From Mountain to	NYCDEP/	This program was presented during Schoharie Watershed		Completed
Manhattan"	GCSWCD	Month.	SMIP	2017
		Invasive Species Day was held at the Mountain Top		
		Arboretum. Attendees learned about common local		
		invasive species and forest pests with Dan Snider from		
		the Catskill Regional Invasive Species Partnership		
		(CRISP) on Saturday, May 13th. Attendees also had a		
		chance to remove lesser celandine and replant with		
		native vegetation on Saturday, May 20th. While		
		originally scheduled for one date, it had to be separated		
	NYCDEP/	into two events due to weather. This program was		Completed
Invasive Species Day	GCSWCD	presented during Schoharie Watershed Month.	SMIP	2017
		The Meadow Project's documentary "Hometown		
		Habitat" was shown at the Orpheum Film & Performing		
		Arts Center in Tannersville. The movie highlighted the		
		importance of planting native plant species, selecting		
		plants that support habitat for wildlife and attract		
		pollinators, and promoting the natural beauty of our local		
		ecosystems. Following the film, there was a 30-minute		
		Q&A panel discussion with local garden experts from the		
		Mountain Top Arboretum, Cornell Cooperative		
		Extension of Columbia-Greene Counties' Master		
		Gardener Volunteer program, and GCSWCD staff.		
		Registered participants received a free small native tree		
"Hometown Habitat"		or shrub to take home for planting courtesy of		
Film Showing and Q&A	NYCDEP/	GCSWCD. This program was presented during		Completed
Panel Discussion	GCSWCD	Schoharie Watershed Month.	SMIP	2017

		GCSWCD helped with trail work for the newly expanded		
		KRT section. GCSWCD set up a table display and		
"Spring Fling" Opening		materials inside the Mountain Top Historical Society		
of the Expanded	NYCDEP/	building as part of the opening event. This program was		Completed
Kaaterskill Rail Trail	GCSWCD	presented during Schoharie Watershed Month.	SMIP	2017
		GCSWCD staff offered "What's a Watershed?"		
		programs at the Mountain Top Library. These programs		
		involved the use of the Augmented Reality Sandbox, the		
		EnviroScape model, and a pollution craft. Attendees		
		learned how to define a watershed and how to identify		
		common sources of watershed pollution. These programs		
"What's a Watershed"	NYCDEP/	were offered to girl scouts (July 12 th) and the general	NYCDEP/	Completed

CATSKILL STREAMS BUFFER INITIATIVE					
Project Title	Partners	Description	Funding	Status	
Shadow Mountain	GCSWCD, NYCDEP	Town of Jewett- East Kill: planted 124 trees and shrubs, hydroseeded and interplanted the riprap at the Greene County Highway Dept. bridge replacement in Jewett over the East Kill.	GCSWCD, NYCDEP	Completed 2007	
Riparian Buffer	GGGWIGE	A protocol for identifying potential planting sites based upon stream management planning researched was evaluated. Also, GCSWCD	agawan		
Implementation pilot	GCSWCD, NYCDEP	approached five of the identified parcel owners and moved forward with the Carr Road riparian restoration project.	GCSWCD, NYCDEP	Completed 2007	
		Town of Jewett- Schoharie Creek: The project had three components including, stem injection treatment of Japanese			
Carr Road Project	GCSWCD, NYCDEP	knotweed to prepare location for re-vegetation with native species, planting of a 100 foot wide buffer along the streambank, and enhancing the existing buffer on the immediate streambank by	GCSWCD, NYCDEP, ACOE	Completed 2007-2009	

		tapering the bank and planting willow tublings and stakes.		
Riparian Program Development	GCSWCD, NYCDEP	In 2007-2008, the Catskill Streams Buffer Initiative (CSBI) was developed to educate and assist streamside landowners in order to provide for improved stewardship of riparian areas. GCSWCD & NYCDEP established guidelines, policies and protocols for the implementation of the program.	GCSWCD, NYCDEP	Completed 2008
Plant Materials Program	GCSWCD, NYCDEP	This program supported enhancement and utilization of GCSWCD's own nursery at the Plant Materials Center, to supply plant material for various planting and seeding projects. The native seed program was initiated in 2008; A relationship with Greenbelt Center, in Staten Island, was established.	GCSWCD, NYCDEP	Completed 2007-2016
Sugar Maples Riparian Buffer Project	GCSWCD, NYCDEP	Town of Windham- Batavia Kill: Treated invasive Japanese knotweed and then planted approximately 800 feet of riparian vegetation.	ACOE (WRDA)	Completed 2008
Vegetation Enhancements	GCSWCD, NYCDEP	Batavia Kill, West Kill, Schoharie Creek, and Manor Kill: Root Production Method (RPM) trees were planted at Big Hollow, Brandywine, and Ashland Connector Reach project sites. A certified herbicide applicator treated Japanese knotweed at Big Hollow, Carr Rd., Schoharie Ave. and Long Rd. project sites. DEP conducted monitoring of vegetative techniques on a majority of these projects. Vegetation enhanced projects in the developed with Greene County Highway, FEMA, at the County Route 13 culvert project, and a volunteer planting in Manor Kill behind the Conesville town hall.	GCSWCD, NYCDEP	Completed 2008
County Route 6	GCSWCD Greene County Highway Dept.	Town of Lexington- West Kill: Implemented vegetation stabilization methodologies at a site on the West Kill that was previously scheduled for all riprap. Along this site, a short section of Vegetation Reinforced Slope Stabilization (VRSS) was installed, and trees and shrubs were planted on the upper bank; willows were interplanted with the riprap.	GCSWCD, NYCDEP	Completed 2008
Deming Road Riparian Project	GCSWCD, NYCDEP	On this project, 723 trees and shrubs, along with 120 willow stakes, were installed on three contiguous parcels.	GCSWCD	Completed 2009
McRoberts Property Planting	GCSWCD, NYCDEP	GCSWCD has a 10 year landowner agreement for this property. Riparian Corridor Management Plan is complete. During this project, 50 trees and shrubs and 125 willow stakes were installed.	CSBI	Completed 2009
Manor Kill Grogan Property Planting	GCSWCD, NYCDEP	SCSWCD has a 5 year agreement for this property. Riparian Corridor Management Plan is complete. During this project, 54 trees and 500 sedge plugs were installed.	CSBI	Completed 2009
Kane Property Planting	GCSWCD, NYCDEP	GCSWCD has a 10 year landowner agreement for this property. Riparian Corridor Management Plan is complete. During this project, 116 trees and 250 willow stakes were installed. Cotalvill Streems Puffer Initiative Pilot. Obtained 5. seem landowners.	CSBI	Completed 2009
Kastanis Property Planting	GCSWCD, NYCDEP	Catskill Streams Buffer Initiative Pilot: Obtained 5- year landowner agreement, completed a riparian corridor management plan and restored approximately 7.1 acres of streamside vegetation along the Batavia Kill, including hosting school groups in the effort and planting about 1,500 trees and shrubs.	CSBI	Completed 2009
Evergreen Planting	GCSWCD, NYCDEP	GCSWCD/NYCDEP worked with the landowner to develop a planting plan and to obtain a landowner agreement for the property. Project is located in the town of Hunter.	CSBI	Completed 2009
Silver Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. GCSWCD removed fence, graded 60 feet of streambank, planted 25 trees and shrubs, and installed 30 willow stakes in May 2010.	CSBI	Completed 2010
Grossman Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Installed a 50 foot riparian buffer and 198 trees and shrubs were plant along 300 feet in May 2010.	CSBI	Completed 2010

		GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Installed 54		
Brunsden Property Planting	GCSWCD, NYCDEP	herbaceous plugs, 22 willow stakes, 5 shrubs, and 2 trees in August 2010.	CSBI	Completed 2010
Avella Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Installed 26 trees and shrubs in June 2010.	CSBI	Completed 2010
Rappleyea Property	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete and 150 trees and shrubs were installed in June 2010.	CSBI	Completed 2010
Planting		GCSWCD has a 10 year landowner agreement for this property. Riparian Corridor Management Plan is complete and 300 trees, shrubs, and weed mats were installed in June 2010 to create a 100 foot wide riparian buffer along 300 feet of the East Kill. GCSWCD	CSBI	
Dodson/McCloskey Property Planting	GCSWCD, NYCDEP	contracted Bevan Forestry to control a patch of Japanese knotweed; Aqua Master was used to inject 25 JKW stems.	CSBI	Completed 2010
Manor Kill Quinn	SCSWCD, GCSWCD,	SCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete and 100 trees, 80 willow stakes/tubes, and 100 sedge plugs were installed in spring 2010. Also, approximately 50-100 JKW plants were removed from		Completed
Property Planting Manor Kill	NYCDEP SCSWCD,	the site. SCSWCD has a 5 year landowner agreement for this property.	CSBI	2010
Brandow Property Planting	GCSWCD, NYCDEP	Riparian Corridor Management Plan is complete and 50 trees, 100 willow stakes/tubes, and sedge plugs were installed in spring 2010.	CSBI	Completed 2010
Manor Kill Gentile Property Planting	SCSWCD GCSWCD NYCDEP	SCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. 292 trees, 50 willow stakes, and 500 sedge plugs were installed in November 2009. 100 additional willow stakes were installed spring 2010.	CSBI	Completed 2010
Hegner Property Planting	GCSWCD, NYCDEP	This property is adjacent to Torsiello, where stream channel was repaired by the town highway department. GCSWCD has a 5 year landowner agreement for this property.	CSBI	Completed 2011
Torsiello PropertyPlanting	GCSWCD, NYCDEP	Flooding, due to Tropical Storm Irene, caused woody debris jam on property. Stream channel was repaired by town highway department. GCSWCD has a 5 year landowner agreement for this property. CSBI installed 275 trees and shrubs.	CSBI	Completed 2011
Cervini Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete and 275 trees and shrubs were installed.	CSBI	Completed 2011
Kelly Property Planting	GCSWCD, NYCDEP	GCSWCD has a 10 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Project involved installation of 94 trees and shrubs along 250 feet to create a 25 foot riparian buffer in the spring of 2011.	CSBI	Completed 2011
Slutzky Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Project involved installation of 793 trees and shrubs with 15 high school students from Gilboa-Conesville CSD. Planting area was 950 feet long and 50 feet wide.	CSBI	Completed 2011
Rivera Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. GCSWCD installed 506 trees and shrubs, 500 willow stakes, and 50 lbs. in two areas along the East Kill. Most trees were lost to post-flood management activities in the fall of 2011.	CSBI	Completed 2011
Bardfield Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete. Installed 432 trees and shrubs with 20 BYC students in a planting area of 700 feet long and 35 feet wide. Many of the trees were lost to post-flood management activities in fall of 2011.	CSBI	Completed 2011

Cole Property	GCSWCD,	GCSWCD has a 5 year landowner agreement for this property. The Riparian Corridor Management Plan is complete. A subcontractor was hired to grade 300 feet of streambank along the West Kill prior to the planting and then 225 trees and shrubs, 200 willow stakes and 300 feet of fascines were installed along 350 feet of the right	GGDV	Completed
Manor Kill Colangelo Riparian Planting	SCSWCD, GCSWCD, NYCDEP	streambank. Riparian planting project on the Manor Kill in Conesville. A Riparian Corridor Management Plan has been completed for this property. In 2009, 354 trees were planted, 150 willow stakes and 500 sedge plugs were installed along 546 feet of stream. In 2010, 340 additional trees and 200 stakes were installed. In 2012, potted stock was planted along 900 feet of the left streambank.	CSBI	Completed 2012
Mayo Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. Riparian Corridor Management Plan is complete and 300 willow stakes were installed along 200 feet of streambank, 94 native trees and shrubs were installed, and 0.23 acres of streamside habitat was seeded.	CSBI	Completed 2013
Enochty Property Planting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. GCSWCD installed 30 willow stakes and 25 native trees and shrubs along 100 feet of stream in the fall of 2013.	CSBI	Completed 2013
Donnelly Riparian Project	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. GCSWCD installed 125 willow stakes and 117 native trees and shrubs along 250 feet of stream in the fall of 2013.	CSBI	Completed 2013
Wilkie Riparian Project	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property. GCSWCD installed 75 willow stakes and 15 native trees and shrubs along 150 feet of stream in the fall of 2013.	CSBI	Completed 2013
Dodson/McCloskey Property Planting Phase 2	GCSWCD, NYCDEP	GCSWCD re-installed a 100 foot wide riparian buffer along 300 feet of stream including, 250 native trees and shrubs and 250 willow stakes in the fall of 2013.	CSBI	Completed 2013
Manor Kill Dahlberg PropertyPlanting	GCSWCD, NYCDEP	GCSWCD has a 5 year landowner agreement for this property and installed 50 native trees and shrubs and willow stakes along 150 feet of stream in 2014.	CSBI	Completed 2014
Police Anchor Camp (Windham Path) Riparian Project	GCSWCD, NYCDEP	Riparian planting project at multiple locations along tributaries of the Batavia Kill and the Windham Path. GCSWCD completed a Riparian Corridor Management Plan and has obtained a landowner agreement for this property. GCSWCD hosted a volunteer planting in 2013, installing 1,028 native trees and shrubs along 1,375 feet of stream. 2.41 acres were restored at three planting locations. GCSWCD removed a gravel berm 223 ft. long x 10 ft. wide x 4.5 ft. high and relocated 371 cubic yards of berm material outside 100 yr. floodplain prior to installing 350 trees to create a riparian buffer. Project area was graded and seeded with riparian mix. With an additional planting along a tributary that bisects the parcel, 460 native trees and shrubs were installed along 820 ft. of stream. 1.23 acres were restored in 2015. Project is complete.	CSBI	Completed 2015
Former Kastanis Property Planting Phase 2	GCSWCD, NYCDEP	Riparian planting project to reestablish a forested riparian buffer 100 feet wide along 1,200 feet of the Batavia Kill was planted in 2009, as a pilot project to restore approximately 7.1 acres of streamside vegetation. In 2015, GCSWCD obtained a land use and herbicide permit to reestablish a forested riparian buffer and treat Japanese knotweed. GCSWCD hosted a volunteer planting and installed 1,100 native trees and shrubs along 1,650 feet of stream, a total of 3.8 acres were restored. Japanese knotweed will require monitoring and follow-up treatment.	CSBI	Completed 2015
Saenger Property Planting	GCSWCD, NYCDEP	A riparian planting to restore approximately 4,500 square feet of streamside vegetation along a Schoharie Creek Tributary in Hunter. In 2015, a volunteer planting was hosted at the site; 120 native trees and shrubs and 20 willow stakes were installed along 137 feet of stream, 0.1 acre was restored.	CSBI	Completed 2015

Posch Riparian Planting	GCSWCD, NYCDEP	Restore approximately 300 linear feet of streamside vegetation along the East Kill. GCSWCD has a 5 year landowner agreement for this property. GCSWCD will install willow stakes along 300 ft. of streambank to reestablish vegetation that washed out in Irene flooding. A riparian planting of 300 native trees and shrubs was installed in spring 2016.	CSBI	Completed 2016
South Street Riparian Planting	GCSWCD, NYCDEP	Riparian plantings were installed to a length totaling approximately 1,000 feet, with buffer widths varying from 45 feet to 100 feet, covering an area of 1.15 acre, along the Batavia Kill in Windham. This volunteer planting project was a 2016 Riverkeeper Sweep event. Staff and volunteers will installed 563 native trees and shrubs.	CSBI	Completed 2016
Sawicki Property Grading and Planting	GCSWCD, NYCDEP	Restore approximately 4,500 square feet of streamside vegetation along a portion of the Schoharie Creek in Hunter. GCSWCD obtained a permit from DEC to grade less than 300 ft. of eroding bank. 35 riparian trees and shrubs were planted along with 180 willow stakes, 3 vertical bundles and 22 fascines to establish riparian vegetation along the left bank of the Schoharie Creek.	CSBI	Completed 2016
Prattsville Ball Field	GCSWCD, NYCDEP, Town of Prattsville	Riparian planting project to restore approximately 200 linear feet of streamside vegetation along the Batavia Kill just upstream of the confluence with the Schoharie Creek in Prattsville at the Everett Conine Memorial Field. Project is not feasible due to presence of Japanese knotweed. CSBI application form was never received.	CSBI	N/A
Chase Property Planting	GCSWCD, NYCDEP	Riparian planting to restore approximately 200 linear feet of streamside vegetation along a Batavia Kill tributary in Hensonville in Fall 2017. Landowner is not interested in planting despite numerous outreach attempts. CSBI application form was never received.	CSBI	N/A
Freedman Planting	GCSWCD, NYCDEP	Restored 0.03 acre of streamside vegetation along a portion of the Stony Clove in Hunter. Planted 55 riparian trees and shrubs along 45 feet of streambank. Will monitor for Japanese knotweed and treat as needed.	CSBI	Completed 2017
Pesciotta Planting	GCSWCD, NYCDEP	Restored 0.3 acre of streamside vegetation along a portion of the East Kill in East Jewett. Planted 195 riparian trees and shrubs along 193 ft. of streambank.	CSBI	Completed 2017
Simmons Planting	GCSWCD, NYCDEP	Restored 0.2 acre of streamside vegetation along a portion of the West Kill in Lexington. Planted 171 riparian trees and shrubs along 176 feet of streambank.	CSBI	Completed 2017
Drake Planting	GCSWCD, NYCDEP	Restored 0.7 acre of streamside vegetation along a portion of the Schoharie Creek in Lexington. Planted 412 riparian trees and shrubs along 362 feet of streambank.	CSBI	Completed 2017
Rikard Planting	GCSWCD, NYCDEP GCSWCD,	Restored 0.26 acre of streamside vegetation along a portion of the Schoharie Creek in Lexington. Planted 120 riparian trees and shrubs along 115 feet of streambank	CSBI	Completed 2017
Bilash Arbor Day Planting	NYCDEP, Trout Unlimited	Restored approximately 1.32 acre of streamside vegetation along 570 feet of the Schoharie Creek in Jewett. Plant 600 bare root riparian trees and shrubs for an Arbor Day volunteer planting event.	CSBI	Completed 2017
Japanese Knotweed Treatment	GCSWCD, NYCDEP	Treated Japanese knotweed with herbicides on the Kastanis Stream Restoration Project in 2017.	CSBI	Completed 2017

Water Temperature	Recreation	inputs. In 2012, RIT conducted imagery collection flight	NYCDEP/	
Impacts on Fisheries	Subcommittee,	and submitted report, in 2013, USGS analyzed and	GCSWCD,	Completed
Study	USGS	summarized the data, and in 2014, USGS submitted report.	USGS	2014

WATERSHED PROTECTION AND COMMUNITY PLANNING					
Project Title	Partners	Description	Funding	Status	
Implementing SEQRA, basics & determinations	GCSWCD, NYCDEP	Participants were provided a basic understanding of the SEQRA process.	NYCDEP/ GCSWCD	Completed Annually 2008-2010	
Federal & NYS Wetland Protection & Regulation	GCSWCD, NYCDEP	Presentation of regulations.	NYCDEP/ GCSWCD	Completed 2008	
		Engaged multiple watershed partners and agencies, municipal officials, and departments (highway, planning, and code enforcement) in the strategy's development which focused on landscape sources that contribute to water quality impairments. Some recommendations were identified as implementation activities in 2009-11 action			
Schoharie Watershed Strategy	GCSWCD, NYCDEP	plan and Schoharie Watershed Advisory Committee reviewed proposals to allocate funding in 2009.	NYCDEP/ GCSWCD	Completed 2008	
Low-Impact Development	NYCDEP, GCSWCD	An overview of an alternative approach to site planning, design, and building that minimizes landscape impacts and preserves the natural hydrological cycle.	NYCDEP/ GCSWCD	Completed 2009	

	T		ı	1
		GCSWCD WAP worked with numerous public and private		
		sector partners to develop a comprehensive master plan that		
	NYCDEP,	focuses on recreation, and also includes open space, scenic		
	GCSWCD,	quality and cultural resources. Two implementation		
	WAP,	subcommittees are working on marketing and coordinating		
	Schoharie	projects and outdoor resource improvements that promote		
Mountaintop Recreation	Basin	access to, and appreciation of, the mountaintop's natural	NYCDEP/	Completed
Master Plan	Municipalities	environment including stream systems.	GCSWCD	2009
Low Impact	NYCDEP,			
Development	GCSWCD,	How improved site planning can achieve multi-objectives	NYCDEP/	Completed
Made Local	WAP	for Schoharie basin communities.	GCSWCD	2010
		GCSWCD worked with the Town of Hunter and the		
		Villages of Tannersville and Hunter to undertake a Corridor		
		Study that entailed comprehensive assessment of potential		
		future development along the State Route 23A corridor. The		
Town of Hunter	NYCDEP,	study was in effort to evaluate foreseeable development and		
Corridor Regional	GCSWCD,	environmental mitigation associated with future	NYCDEP/	Completed
Planning Study	WAP	development.	GCSWCD	2010
	GCSWCD,	Workshop participants were informed about the permit		
State and City	NYCDEP,	requirements of NYSDEC, NYCDEP and what triggers a	NYCDEP/	Completed
Stormwater Regulations	NYSDEC		GCSWCD	2011
Stormwater Regulations	NISDEC	permit.	GCSWCD	2011
		GCSWCD's WAP, Kendall Stormwater Services, and		
		Morris Associates worked with Ashland, Jewett, Lexington,		
		Windham, Hunter, and Tannersville. For each community,		
		there was a comprehensive code review against model		
		development principles, helped identify which principles to		
		address for local government, developed LID manual for		
M		communities to use in site planning, and to share with	CMID	G 1.1
Mountaintop Better Site	CCCMCD	landowners and developers. Also, an education packet, for	SMIP,	Completed
Design Plan Workshops	GCSWCD	easier reference, was developed.	LTAP	2011-2012
		Conducted a detailed review of Hunter's land use		
Town of Hunter Land	Town of	regulations. Hunter adopted revisions, new regulations &/or		
Use Regulation Review	Hunter,	guidelines that promote low impact design, climate smart		
& Development	GCSWCD,	and smart growth principles. A land use committee was		Completed
Guidelines	NYCDEP	formed to guide the process.	SMIP	2016

ENHANCING PUBLIC ACCESS TO STREAMS				
Action Item	Partners	Description	Funding	Status
		GCSWCD worked with the Town of Prattsville on a master		
		plan for redevelopment of Conine Field. Key conservation		
		issues included fishing access point, knotweed management, a		
		riparian buffer planting and a conservation easement on sections		
	GCSWCD,	of the property adjoining the Batavia Kill and Schoharie Creek		
Prattsville Conine	NYCDEP,	and a stormwater pollution prevention plan retrofitting the site	NYCDEP/	Completed
Park	Prattsville	to meet current standards for new construction.	GCSWCD	2008
		GCSWCD assisted the Town of Windham with the		
		development of a public access area on a NYCDEP owned		
		parcel in the hamlet of Windham. The GCSWCD completed a		
	GCSWCD,	site design, Stormwater Pollution Prevention Plan and other	NYCDEP/	
Windham Creamery	NYCDEP,	documents. The design included the construction of parking	GCSWCD,	Completed
Pond	Windham	area and athletic fields and was left to the town to complete.	Windham	2008
Town of Windham	GCSWCD,	GCSWCD provided conceptual plans to the Town of Windham	NYCDEP/	
(Police Anchor	NYCDEP,	to assist with assessment and planning for public use of a 65	GCSWCD,	Completed
Camp)	Windham	acre parcel located in the Batavia Kill watershed.	Windham	2010

		CCCWCD 1NVCDED 1111		
A abland Elabina	CCCWCD	GCSWCD and NYCDEP completed a parking area and access		
Ashland Fishing	GCSWCD,	to an existing public fishing area on the Batavia Kill at the	NWCDED/	C 1 1
Access	NYCDEP,	Ashland Connector Reach Restoration Project. The access	NYCDEP/	Completed
Enhancements	Ashland	includes an information kiosk.	GCSWCD	2010
	CCCWCD	All stream management plans recommend enhancing public		
	GCSWCD,	access of the streams for fishing. Along many of the streams		
D	NYCDEP,	within the Schoharie Watershed, there are public fishing access		
Promote Increased Recreational Use of	Recreation & Habitat	points; existing access locations have been mapped. Through	NVCDED/	Commisted
Watershed Streams	Subcommittee	the Recreation and Habitat category, multiple stream access	NYCDEP/ GCSWCD	Completed 2010
watershed Streams	GCSWCD,	parks have been and will continue to be supported by SWAC.	GCSWCD	2010
	NYCDEP,	The Town of Prattsville was approved for SMIP funding October 2009; this grant was closed in August 2012, due to site		
Prattsville Stream	Prattsville,	constraints and significant flood damage throughout Prattsville		Completed
Access Parking	SWAC	during Hurricane Irene in 2011.		Completed 2012
Access Farking	SWAC	GCSWCD and NYCDEP assisted Town of Windham and the	 	2012
		Windham Area Recreation Foundation with installation of a		
		public, non-motorized, multi-use trail along a 65 acre parcel		
	GCSWCD,	located along the Batavia Kill. SWAC/SMIP funds were used to		
	NYCDEP,	cover the cost of materials for a boardwalk and footbridges. The	NYCDEP/	
	WARF,	path is used almost daily by local residents and visitors of	GCSWCD,	Completed
Windham Path	Windham	Windham.	WARF	2013
** manam r am	** manam	The GCSWCD assisted the Town of Lexington with the	WING	2013
		development of a small "pocket park" located on the Schoharie		
		Creek. The project included the removal of a derelict house		
		(completed 2007), cleaning up weedy growth, enhancement of		
		riparian vegetation and installation of low impact improvements		
	NYCDEP,	such as demonstrative plantings, informational signage and		
Schoharie Creek	GCSWCD,	stream access. Plantings were installed in 2010 and repaired in		
Park (Town of	Town of	2012 following flood damages. In 2012, split rail fencing was		Completed
Lexington)	Lexington	installed. In 2015, signage was installed.	SMIP	2015
		The Windham Area Recreation Foundation is working on		
		expanding the Windham Path, a 1.3 mile non-motorized, multi-		
		use recreational trail in the Town of Windham near the Batavia		
	NYCDEP,	Kill. Phase 2 extends the trail over the Batavia Kill on a	SMIP,	
	GCSWCD,	pedestrian bridge to the Route 296/South Street business	Windham,	
	WAP,	district. A second SMIP grant was awarded in 2014 for two	NYCDEP/	
Windham Path	WARF,	small wooden footbridges that cross wet areas along the path's	GCSWCD,	Completed
Phase 2	SWAC	phase 2 extension, and a trailhead sign and kiosk on Route 296.	WARF	2015
		The SCSWCD, GCSWCD, NYCDEP and the Town of		
		Conesville worked together to rehabilitate the existing walking		
	NYCDEP,	path in the Conesville Town Park. A SMIP grant was awarded		
Conesville Town	GCSWCD,	in 2014; the design, permitting and construction of the path		Completed
Park Walking Path	SCSWCD	were combined with the Manor Kill Stream Restoration Project.	SMIP	2015
	NYCDEP,			
	GCSWCD,	The project is a sub-component of the overall redevelopment		
	Town of	and expansion of Conine Field Recreation Complex in		
Conine Fishing	Prattsville,	Prattsville. This part of the project focused on repairing and		Completed
Access	SWAC	improving the fishing area and canoe launch at Conine Field.	SMIP	2016
		The project supported efforts to provide public access to the		
	Ashland,	Batavia Kill and included signage, seeding, and riparian		
	GCSWCD,	plantings. Signage was installed in 2016. Riparian plantings		Completed
Ashland Town Park	NYCDEP	were installed in spring 2017.	SMIP	2017
	1,1000	1	1	

STREAM ACCESS EDUCATION AND OUTREACH				
Action Item	Partners	Description	Funding	Status
	GCSWCD,	A Kiosk for Conesville was provided by GCSWCD, and a		
Manor Kill	NYCDEP,	general Schoharie Watershed/Schoharie SWCD educational	NYCDEP/
